Handbook of Digital Resources in Mathematics Education Birgit Pepin, Ghislaine Guedet, Jeffrey Choppin, 2024-06-21 This handbook presents the state of the art scholarship on theoretical frames mathematical content learning environments pedagogic practices teacher professional learning and policy issues related to the development and use of digital resources in mathematics education With the advent of more and more open access digital resources teachers choose from the web what they see fit for their classroom students choose in the moment what they need for their projects and learning paths However educators and students often find it difficult to choose from the abundance of materials on offer as they are uncertain about their quality and beneficial use It is clear that at a time of bouleversement of the teaching learning processes it is crucial to understand the quality and the potentially transformative aspects of digital resources This book provides comprehensive

analyses of and insights into the transformative aspects of digital resources *International Handbook of Mathematics Education* Alan Bishop, M.A. (Ken) Clements, Christine Keitel-Kreidt, Jeremy Kilpatrick, Colette Laborde, 2012-12-06 ALAN J BISHOP Monash University Clayton Victoria Australia RATIONALE Mathematics Education is becoming a well documented field with many books journals and international conferences focusing on a variety of aspects relating to theory research and practice That documentation also reflects the fact that the field has expanded enormously in the last twenty years At the 8th International Congress on Mathematics Education ICME in Seville Spain for example there were 26 specialist Working Groups and 26 special ist Topic Groups as well as a host of other group activities In 1950 the Commission Internationale pour l Etude et l Amelioration de l Enseignement des Mathematiques CIEAEM was formed and twenty years ago another active group the International Group for the Psychology of Mathematics Education PME began at the third ICME at Karlsruhe in 1976 Since then several other specialist groups have been formed and are also active through regular conferences and publications as documented in Edward Jacobsen s Chapter 34 in this volume **Handbook of Educational Psychology** Patricia A. Alexander, Philip H. Winne, 2006 Provides coverage of the field of educational psychology This book includes topics such as adult development self regulation changes in knowledge and beliefs and writing It is useful to scholars teacher educators practitioners policy makers and academic libraries It is also suitable for graduate level courses in educational psychology *Resources in Education* ,1994 Serves as an index to Eric reports microform *Affect and Mathematics Education* Markku S. Hannula, Gilah C. Leder, Francesca Morselli, Maike Vollstedt, Qiaoping Zhang, 2019-06-03 This open access book inspired by the ICME 13 topic study group Affect beliefs and identity in mathematics education presents the latest trends in research in the area Following an introduction and a survey chapter providing a concise overview of the state of art in the field of mathematics related affect the book is divided into three main sections motivation and values engagement and identity in mathematics education Each section comprises several independent chapters based on original research as well as a reflective commentary by an expert in the area Collectively the chapters present a rich methodological spectrum from narrative analysis to structural equation modelling In the final chapter the editors look ahead to future directions in the area of mathematics education related affect It is a timely resource for all those interested in the interaction between affect and mathematics education *Mapping Equity and Quality in Mathematics Education* Bill Atweh, Mellony Graven, Walter Secada, Paola Valero, 2011-01-06 Concerns about quality mathematics education are often posed in terms of the types of mathematics that are worthwhile and valuable for both the student and society in general and about how to best support students so that they can develop this mathematics Concerns about equity are about who is excluded from the opportunity to develop quality mathematics within our current practices and systems and about how to remove social barriers that systematically disadvantage those students This collection of chapters summarises our learning about the achievement of both equity and quality agendas in mathematics education and to move forward the debate on their

importance for the field **Second Handbook of Research on Mathematics Teaching and Learning** Frank K. Lester, 2007-02-01 The audience remains much the same as for the 1992 Handbook namely mathematics education researchers and other scholars conducting work in mathematics education This group includes college and university faculty graduate students investigators in research and development centers and staff members at federal state and local agencies that conduct and use research within the discipline of mathematics The intent of the authors of this volume is to provide useful perspectives as well as pertinent information for conducting investigations that are informed by previous work The Handbook should also be a useful textbook for graduate research seminars In addition to the audience mentioned above the present Handbook contains chapters that should be relevant to four other groups teacher educators curriculum developers state and national policy makers and test developers and others involved with assessment Taken as a whole the chapters reflects the mathematics education research community's willingness to accept the challenge of helping the public understand what mathematics education research is all about and what the relevance of their research findings might be for those outside their immediate community **Handbook of International Research in Mathematics Education** Lyn D. English, David Kirshner, 2010-04-02 This book brings together mathematics education research that makes a difference in both theory and practice research that anticipates problems and needed knowledge before they become impediments to progress **Proficiency and Beliefs in Learning and Teaching Mathematics** Yeping Li, Judit N. Moschkovich, 2013-09-04 Efforts to improve mathematics education have led educators and researchers to not only study the nature of proficiency beliefs and practices in mathematics learning and teaching but also identify and assess possible influences on students and teachers' proficiencies beliefs and practices in learning and teaching mathematics The complexity of these topics has fascinated researchers from various backgrounds including psychologists cognitive or learning scientists mathematicians and mathematics educators Among those researchers two scholars with a similar background Alan Schoenfeld in the United States and Gnter Tmer in Germany are internationally recognized for their contributions to these topics To celebrate their 65th birthdays in 2012 this book brought together many scholars to reflect on how their own work has built upon and continued Alan and Gnter's work in mathematics education The book contains 17 chapters by 33 scholars from six different education systems This collection describes recent research and provides new insights into these topics of interest to mathematics educators researchers and graduate students who wish to learn about the trajectory and direction of research on these issues **Critical Issues in Mathematics Education** Philip Clarkson, Norma C. Presmeg, 2008-09-22 Critical Issues in Mathematics Education presents the significant contributions of Professor Alan Bishop within the mathematics education research community Six critical issues each of which have had paramount importance in the development of mathematics education research are reviewed and include a discussion of current developments in each area Teacher decision making spatial visualizing geometry teachers and research cultural social aspects of mathematics education

sociopolitical issues and values serve as the basic issues discussed in this examination of mathematics education over the last fifty years during which Professor Bishop has been active in the field A comprehensive discussion of each of these topics is realized by offering the reader a classic research contribution of Professor Bishop s together with commentary and invited chapters from leading experts in the field of mathematics education Critical Issues in Mathematics Education will make an invaluable contribution to the ongoing reflection of mathematic education researchers worldwide but also to policy makers and teacher educators who wish to understand some of the key issues with which mathematics education has been and still is concerned and the context within which Professor Bishop s key contributions to these research issues were made **Third**

International Handbook of Mathematics Education M.A. (Ken) Clements,Alan Bishop,Christine Keitel-Kreidt,Jeremy Kilpatrick,Frederick Koon-Shing Leung,2012-11-15 The four sections in this Third International Handbook are concerned with a social political and cultural dimensions in mathematics education b mathematics education as a field of study c technology in the mathematics curriculum and d international perspectives on mathematics education These themes are taken up by 84 internationally recognized scholars based in 26 different nations Each of section is structured on the basis of past present and future aspects The first chapter in a section provides historical perspectives How did we get to where we are now the middle chapters in a section analyze present day key issues and themes Where are we now and what recent events have been especially significant and the final chapter in a section reflects on policy matters Where are we going and what should we do Readership Teachers mathematics educators ed policy makers mathematicians graduate students undergraduate students Large set of authoritative international authors **Hidden Dimensions in the Professional**

Development of Mathematics Teachers: In-Service Education for and With Teachers B. Roesken,2011-07-23 Professional development is often determined by black and white thinking Either issues are considered as being good or bad or statements like teachers should or teachers must are transported However it is easily forgotten from which perspective the judgment is taken surely it is not the teacher s one Profoundly respecting and cherishing the teachers and their needs allows for arriving at a vision of professional development that is for and with teachers instead being simply about them This book presents the field of mathematics teacher professional development both from a theoretical and an empirical perspective In particular the initiative Mathematics Done Differently that has been run in Germany is presented in whose context the data of the empirical study was gathered The empirical findings led to postulating a model describing teachers individual growth pathways and to providing implications for constructing practices that are based on what teachers really need **Fourth International Handbook of Mathematics Education** M.A. (Ken) Clements,Berinderjeet Kaur,Thomas Lowrie,Vilma Mesa,Johan Prytz,2024-11-19 This fourth international handbook discusses developments not recognized or dealt with fully in the first three Springer Mathematics Education handbooks and tackles controversial issues in the field After starting with a provocative introductory chapter which asks whether controversy is a healthy feature of international

mathematics education the four following sections cover a mathematics education in Asia b the roles of theory in research and practice c equity and social justice and d curriculum and change These themes are taken up in 28 chapters by 60 authoritative authors from all continents Each of the four sections is structured on the basis of past present and future aspects Like the first three mathematics education handbooks this handbook provides a very valuable resource for teachers mathematics education practitioners and researchers education policy makers and mathematicians as well as graduate and undergraduate students

Toward Equity and Social Justice in Mathematics Education Tonya Gau Bartell, 2018-08-14 This critical volume responds to the enduring challenge in mathematics education of addressing the needs of marginalized students in school mathematics and stems from the 2015 Annual Meeting of the North American Group of the Psychology of Mathematics Education PME NA This timely analysis brings greater clarity and support to such challenges by narrowing in on four foci theoretical and political perspectives toward equity and justice in mathematics education identifying and connecting to family and community funds of knowledge student learning and engagement in preK 12 mathematics classrooms and supporting teachers in addressing the needs of marginalized learners Each of these areas examines how race class culture power justice and mathematics teaching and learning intersect in mathematics education to sustain or disrupt inequities and include contributions from scholars writing about mathematics education in diverse contexts Included in the coverage Disrupting policies and reforms to address the needs of marginalized learners A socio spatial framework for urban mathematics education Linking literature on allywork to the work of mathematics teacher educators Transnational families mathematical funds of knowledge Multilingual and technological contexts for supporting learners mathematical discourse Preservice teachers strategies for teaching mathematics with English learners *Toward Equity and Social Justice in Mathematics Education* is of significant interest to mathematics teacher educators and mathematics education researchers currently addressing the needs of marginalized students in school mathematics It is also relevant to teachers of related disciplines administrators and instructional designers interested in pushing our thinking and work toward equity and justice in mathematics education
