Vegetation Dynamics - Ecosystem Management, Conservation, and Protection, 2025-05-07 Vegetation in general and forest systems in particular are of primordial importance in providing essential ecosystem goods and services, mitigating greenhouse gas effects, and contributing to landscape restoration. The chapters of this book underscore the importance of conducting both short and long term trials as well as small and large scale studies to effectively monitor and assess vegetation's spatial and temporal variability and dynamics. The book highlights the convenience of proper sampling, modelling, and consideration of species traits and edaphic and climatic conditions for a comprehensive understanding of vegetation dynamics over time and across different environments. This knowledge enables the adaptation and development of management and alternative uses of the goods. Overall understanding the ecosystems and their variability in space and time contributes to the ecosystems sustainability, resilience, and resistance to disturbances.

For researchers as well as students and newcomers to the field.

Modern Research Methods for the Study of Behavior in Organizations Jose M. Cortina, Ronald S. Landis, 2013 The goal of the chapters in this SIOP Organizational Frontiers Series volume is to challenge researchers to break away from the rote application of traditional methodologies and to capitalize upon the wealth of data collection and analytic strategies available to them. In that spirit, many of the chapters in this book deal with methodologies that encourage organizational scientists to reconceptualize phenomena of interest, e.g., experience sampling, catastrophe modeling, employ novel data collection strategies, e.g., data mining, Petri nets, and/or apply sophisticated analytic techniques, e.g., latent class analysis. The editors believe that these chapters provide compelling solutions for the complex problems faced by organizational researchers.
