Thalheim, Yasushi Kiyoki, Naofumi Yoshida, 2023-02-07 The amount and complexity of information is continually growing and information modeling and knowledge bases have become important contributors to technology and to academic and industrial research in the 21st century They address the complexities of modeling in digital transformation and digital innovation reaching beyond the traditional borders of information systems and academic computer science research This book presents the proceedings of EJC 2022 the 32nd International conference on Information Modeling and Knowledge Bases held as a hybrid event due to restrictions related to the Corona virus pandemic in Hamburg Germany from 30 May to 3 June 2022 The aim of the conference is to bring together experts from different areas of computer science and other disciplines with a common interest in understanding and solving the problems of information modeling and knowledge bases and applying the results of research to practice The conference has always been open to new topics related to its main themes and the content emphasis of the conferences have changed through the years according to developments in the research field so philosophy and logic cognitive science knowledge management linguistics and management science as well as machine learning and AI are also relevant areas This book presents 19 reviewed and selected papers covering a wide range of topics upgraded as a result of comments and discussions during the conference Providing a current overview of recent developments the book will be of interest to all those using information modeling and knowledge bases as part of their work EPS - High Energy Physics '89 R. Fernandez Alvarez-Estrada, C. Lopez, F. Barreiro, 2016-06-03 EPS High Energy Physics 89 presents the proceeding of the International Europhysics Conference on High Energy physics held in Madrid Spain on September 6 13 1989 This book outlines several topics on the interface between cosmology astrophysics and particle physics Organized into two parts encompassing 181 chapters this compilation of papers begins with an overview of the implications of the cosmic light element abundances This text then examines the various aspects of lattice field theory Other chapters consider the theoretical evidence of a fundamental length in string theory and outline the main features of the higher order corrections to the heavy quark inclusive cross section This book discusses as well the theory of heavy quark production in hadron collision The final chapter deals with the idea of low energy supersymmetry which relates the scale of supersymmetry breaking to the origin and stability of the electroweak scale This book is a valuable resource for astrophysicists physicists and scientists *Proceedings of the International Europhysics Conference on High Energy Physics*
