

What are matters of faith and morals?

- Faith refers to religious doctrines (such as Christ rose from the dead).
- Morals refer to behavior, for example, not to practice infanticide, something the early Christian neighbors did.

Matters Of Faith And Morals

Christoph Luetge

Matters Of Faith And Morals:

Matters of Faith and Morals James Gaffney, 1987 *Matters of Faith and Morals* brings together a number of original essays on ethics and on relationships between ethics and other disciplines pertaining to religion and social sciences. They are not expositions of recognized positions within established schools of thought but exploratory and controversial. They are intended not to transmit a traditional body of doctrine but to foster discussion and encourage argument in the interest of intellectual progress.

Faith and Reason Anthony Fisher, Hayden Ramsay, 2004 The first in a new series with Australian Catholic University this collection of essays deals with two important themes. Faith and reason are heavily weighted words. They point to elemental aspects of human existence. The papers and discussions presented strive to clarify and correlate these basic activities or dimensions of human beings. In all the complexities of the possible relationships and interweaving of faith and reason two kinds of questions keep recurring. One the one hand what is the value of human intelligence and how is it endorsed and supported by faith. On the other hand what is the distinctive intelligence or rationality of faith and how does it relate to the perennial search for wisdom represented in its various philosophical forms. Contributors include Marilyn McCord Adams, Raimond Gaita, John Haldane, John McDermott SJ, Kevin Hart and Anthony Kelly CSsR.

Faith's Defenders Dr. Octavian Caius Obeada, 2024-07-28 *Faith's Defenders* The Christian Apologetic Mission offers a comprehensive exploration of the crucial role of apologetics in the Christian Church. It examines the foundational beliefs, historical challenges, and modern day threats to Christianity while providing a detailed overview of apologetics from early Christianity to the present. The book emphasizes the need for respectful and intellectually rigorous strategies to engage with contemporary culture, address doubts, and reinvigorate faith. Drawing on insights from renowned defenders of the faith, it highlights the importance of apologetics in strengthening the Church's witness and fostering meaningful dialogue, making a compelling call for the Church to present the gospel with confidence, clarity, and compassion. Reason Informed by Faith Richard M. Gula, 1989 Excellent textbook introduction to the basic issues of fundamental moral theology that considers all of today's moral issues.

Against All Heresies Alfonso de Castro, O. F. M., 2021-12-08 *Against All Heresies* was written at the request of Spanish merchants of Flanders to combat heretics and was first published in Paris in 1534. It is a description and criticism of more than 400 heresies which had arisen in the Church since the time of the Apostles, presented in alphabetical order. It was the author's most popular work for which he received the nickname 'the scourge of heretics'. King Philip II of Spain, whom the author served as chaplain, wrote in the preface of this work that this book is such a useful and beneficial book for the Christian state.

Cathedra Veritatis: On the Extension of Papal Infallibility John Joy, 2012-11-27 This work explores the extension of papal infallibility with regard to its object doctrine of faith and morals and with regard to its act ordinary teaching and extraordinary or solemn definition Two main questions are taken up in the first part whether it is certain that the pope is able to speak infallibly about doctrines pertaining to faith or morals which are not directly included in the deposit of faith e.g. the canonization of saints and secondly whether this secondary object of infallibility extends to everything pertaining to faith and morals so as to include for example every particular moral norm of the natural law The second part is then primarily concerned with the question as to whether the pope is infallible only in the exercise of his extraordinary magisterium or whether the ordinary papal magisterium might also be infallible in some cases

R. S. Mead,2013-11-08 This is the edition including all three books and a detailed essay about Hermeneutics The so called Hermetic writings have been known to Christian writers for many centuries The early church Fathers Justin Martyr Tertullian Clement of Alexandria quote them in defense of Christianity Stobaeus collected fragments of them The Humanists knew and valued them They were studied in the sixteenth and seventeenth centuries and in modern times have again been diligently examined by many scholars G R S Mead has issued a translation of the whole body of extant literature with extended prolegomena commentary etc There is a wide difference of opinion as to the date at which this literature was produced Mead believes that some of the extant portions of it are at least as early as the earliest Christian writings while von Christ assigns them to the third Christian century and thinks that they show the influence of neo Platonism To affirm that they influenced New Testament usage would be hazardous but they perhaps throw some light on the direction in which thought was moving in New Testament times

The Vatican Decrees in Their Bearing on Civil Allegiance William Ewart Gladstone,1874 **Galileo, Bellarmine, and the Bible** Richard J. Blackwell,1991-01-31 Considered the paradigm case of the troubled interaction between science and religion the conflict between Galileo and the Church continues to generate new research and lively debate Richard J Blackwell offers a fresh approach to the Galileo case using as his primary focus the biblical and ecclesiastical issues that were the battleground for the celebrated confrontation Blackwell s research in the Vatican manuscript collection and the Jesuit archives in Rome enables him to re create a vivid picture of the trends and counter trends that influenced leading

Catholic thinkers of the period the conservative reaction to the Reformation the role of authority in biblical exegesis and in guarding orthodoxy from the inroads of unbridled spirits and the position taken by Cardinal Bellarmine and the Jesuits in attempting to weigh the discoveries of the new science in the context of traditional philosophy and theology A centerpiece of Blackwell's investigation is his careful reading of the brief treatise *Letter on the Motion of the Earth* by Paolo Antonio Foscarini a Carmelite scholar arguing for the compatibility of the Copernican system with the Bible Blackwell appends the first modern translation into English of this important and neglected document which was placed on the Index of Forbidden Books in 1616 Though there were differing and competing theories of biblical interpretation advocated in Galileo's time the legacy of the Council of Trent the views of Cardinal Bellarmine the most influential churchman of his time and finally the claims of authority and obedience that weakened the ability of Jesuit scientists to support the new science all contributed to the eventual condemnation of Galileo in 1633 Blackwell argues convincingly that the maintenance of ecclesiastical authority not the scientific issues themselves led to that tragic trial
