which mother and infant respond to each other are rhythmically patterned vocalizations and exaggerated face and body movements that Dissanayake calls rhythms and sensory modes Rhythms and modes also give rise to the arts Because humans are born predisposed to respond to and use rhythmic modal signals societies everywhere have elaborated them further as music mime dance and display in rituals which instill and reinforce valued cultural beliefs Just as rhythms and modes coordinate and unify the mother infant pair in ceremonies they coordinate and unify members of a group Today we humans live in environments very different from those of our ancestors They used ceremonies the arts to address matters of serious concern such as health prosperity and fecundity that affected their survival Now we tend to dismiss the arts to see them as superfluous only for an elite But if we are biologically predisposed to participate in artlike behavior then we actually need the arts Even or perhaps especially in our fast paced sophisticated modern lives the arts encourage us to show that we care about important things
