An Empirical Study of Residential Developer Bankruptcies in the United States 2007-2008 Pei Yee Woo, 2010 With falling home prices and home foreclosures currently acknowledged as a severe problem in the U S more attention needs to be paid to the contributing phenomenon of residential developers undergoing liquidation which has left behind a trail of partially completed or abandoned properties This dissertation presents the results of an empirical investigation aimed at understanding this phenomenon Specifically we addressed the following research questions How have the Chapter 11 bankruptcy cases of residential developers and home builders during this downturn been resolved How did the actions taken by secured lenders in the course of bankruptcy proceedings shape the resolution outcome To what extent was bank behavior during these bankruptcies affected and constrained by the banking regulatory framework and culture This dissertation research involves the analysis of more than 200 residential developers that filed Chapter 11 bankruptcy petitions between November 2007 and December 2008 The main finding is that only a small minority of these developers confirmed a reorganization plan The majority of the cases were dismissed or converted to Chapter 7 culminating in foreclosure or liquidation Over 70% of the cases showed at least one instance where a secured lender sought lift stay motions to pursue foreclosure Among such cases orders granting the lift stay motions were granted most of the time Investigating this insistence on quick foreclosure more nuanced views of banks lending functions risk management and their regulatory environment are explored through a study of FDIC data interviews with industry participants and banks comment letters A key finding is that during a recession banks may have a preference for liquidation in bankruptcy because of capital shortfalls and procyclical regulatory pressure to reduce portfolio concentrations particularly in real estate lending This would be inconsistent with theories that secured lenders will choose economically optimal outcomes within a bankruptcy case as they may choose outcomes that are sub optimal within a bankruptcy to maximize an exogenous urgent need for capital

part considers categories of collateral that may require special rules **Where Credit is Due** John Powell,Christy Rogers,2013-11-21 While much recent attention has been focused on the subprime lending and foreclosure crisis little has been said about its radically disparate impact Drawing upon history as well as insight into the current crisis this book shows that this crisis is not an anomaly especially for people of color nor is it over People of color have been excluded from wealth building opportunities via homeownership continuously throughout United States history from the outright denial of credit and residential racial discrimination to federally sponsored urban renewal programs The subprime lending and foreclosure crisis is predicted to strip a quarter of a trillion dollars in wealth from black and Latino homeowners It has reversed home ownership gains for people of color and has decimated neighborhoods across the United States while impacting local regional national and international economies The consequences are devastating This collection of essays provides a framework for creating equitable policy and ultimately building more stable communities for all Americans *Secured Transactions: A Systems Approach* , *Courting Failure* Lynn LoPucki,2010-06-02 LoPucki s provocative critique of Chapter 11 is required reading for everyone who cares about bankruptcy reform This empirical account of large Chapter 11 cases will trigger intense debate both inside the academy and on the floor of Congress Confronting LoPucki s controversial thesis that competition between bankruptcy judges is corrupting them is the most pressing challenge now facing any defender of the status quo Douglas Baird University of Chicago Law School This book is smart shocking and funny This story has everything professional greed wrecked companies and embarrassed judges Insiders are already buzzing Elizabeth Warren Leo Gottlieb Professor of Law Harvard Law School LoPucki provides a scathing attack on reorganization practice *Courting Failure* recounts how lawyers managers and judges have transformed Chapter 11 It uses empirical data to explore how the interests of the various participants have combined to create a system markedly different from the one envisioned by Congress LoPucki not only questions the wisdom of these changes but also the free market ideology that supports much of the general regulation of the corporate sector Robert Rasmussen University of Chicago Law School A sobering chronicle of our broken bankruptcy court system *Courting Failure* exposes yet another American institution corrupted by greed avarice and the thirst for power Lynn LoPucki s eye opening account of the widespread and systematic decay of America s bankruptcy courts is a blockbuster story that has yet to be reported in the media LoPucki reveals the profound corruption in the U S bankruptcy system and how this breakdown has directly led to the major corporate failures of the last decade including Enron MCI WorldCom and Global Crossing LoPucki one of the nation s leading experts on bankruptcy law offers a clear and compelling picture of the destructive power of forum shopping in which corporations choose courts that offer the most favorable outcome for bankruptcy litigation The courts lured by big money and prestige streamline their requirements and lower their standards to compete for these lucrative cases The result has been a series of increasingly shoddy reorganizations of major American corporations proposed by greedy corporate executives and authorized by case hungry judges Secured

Transactions Law Reform Louise Gullifer, Orkun Akseli, 2016-10-20 Secured transactions law has been subjected to a close scrutiny over the last two decades. One of the main reasons for this is the importance of availability of credit and the consequent need to reform collateral laws in order to improve access to finance. The ability to give security effectively influences not only the cost of credit but also in some cases whether credit will be available at all. This requires rules that are transparent and readily accessible to non lawyers as well as rules that recognise the needs of small and medium sized enterprises. This book critically engages with the challenges posed by inefficient secured credit laws. It offers a comparative analysis of the reasons and the needs for a secured transactions law reform as well as discussion of the steps taken in many common law civil law and mixed law jurisdictions. The book written under the auspices of the Secured Transactions Law Reform Project informs the debate about reform and advances novel arguments written by world renowned experts that will build upon the existing literature and as such will be of interest to academics legal practitioners and the judiciary involved in secured transactions law around the world. The text considers reform initiatives that have taken place up to the end of April 2016. It has not been possible to incorporate events since then into the discussion. However notable developments include the banks decree passed by the Italian Government on 29th June 2016 and the adoption of the Model Law on Secured Transactions by UNCITRAL on 1st July 2016.
