**Post-conflict Administrations in International Law** Eric de Brabandere, 2009-04-24 The concept of international administrations of territory in which comprehensive administrative powers are exercised by or on behalf of or with the agreement of the United Nations has recently re-emerged in the context of reconstructing parts of states after conflict. Although in Kosovo and East Timor the UN was endowed with wide-ranging executive and legislative powers in the subsequent operations in Afghanistan it was decided to principally rely on local capacity with minimal international participation and in Iraq administrative power was exercised by the occupying powers. The objectives are however very similar. This work first delineates the origins of the granting of administrative functions to international actors and analyses the context in which it has resurfaced, namely post-conflict peace building or reconstruction. Secondly, the book methodically establishes the legal framework applicable to post-conflict administrations and peace building operations by taking into account the post-conflict scenario in which they operate. Based on these two analyses, an enquiry into the practice of the reconstruction processes in Kosovo, East Timor, Afghanistan, and Iraq is undertaken to analyse and understand the influence of the international legal framework and the different approaches on the implementation of the mandates. Finally, the book concludes with an analysis of questions on exit strategies, local ownership, the internationalisation of domestic institutions, and the need for a comprehensive approach towards post-conflict reconstruction.

**Progress in International Law** Miller, Rebecca M. Bratspies, 2008-06-30 Progress in International Law is a comprehensive accounting of international law for our times. Forty leading international law theorists analyze the most significant current issues in international law and their critical assessments draw diverse conclusions about the current state and future prospects of international law. The material is grouped under the headings: The History and Theory of International Law; The Sources of International Law and Their Application in the United States; International Actors; International Jurisdiction and International Jurisprudence; The Use of Force and the World's Peace; and The Challenge of Protecting the Environment and Human Rights. The book draws its inspiration from a similar survey undertaken in 1932 by Harvard Law Professor and PCIJ Judge Manley O. Hudson. In his book Progress in International Organization, Hudson sought to demonstrate that what he perceived as an emerging international infrastructure and as moves toward the rule of law in international affairs were sure signs of human progress towards peace and cooperation. Progress in International Law critically engages with that claim as a normative matter and at the same time presents the evidence by which a judgment about our own progress towards peace and cooperation might be judged.

*The US Military Profession into the 21st Century* Sam Sarkesian, Robert Connor, 2006-04-18 This brand new edition of *The US Military Profession into the Twenty First Century* re examines the challenges faced by the military profession in the aftermath of the international terrorist attack on the United States on September 11 2001 While many of the issues facing the military profession examined in the first edition remain the new war and international terrorism have compounded the challenges The US military must respond to the changed domestic and strategic landscapes without diminishing its primary function a function that now many see that goes beyond success on the battlefield Not only has this complicated the problem of reconciling the military professional ethos and *raison d'etre* with civilian control in a democracy it challenges traditional military professionalism This book also studies the notion of a US military stretched thin and relying more heavily on the US Federal Reserves and National Guard These developments make the US military profession increasingly linked to public attitudes and political perspectives In sum the challenge faced by the US military profession can be termed a dual dilemma It must respond effectively to the twenty first century strategic landscape while undergoing the revolution in military affairs and transformation At the same time the military profession must insure that it remains compatible with civilian cultures and the US political social system without eroding its primary function This is an invaluable book for all students with an interest in the US Military and of strategic studies and military history in general

**The UN and Human Rights** Guglielmo Verdirame, 2011-09-08 Through an analysis of UN operations including international territorial administration refugee camps peacekeeping the implementation of sanctions and the provision of humanitarian aid this book shows that the powers exercised by the UN carry a serious risk of human rights abuse The International Law Commission has codified and developed the law of institutional responsibility but while indispensable these principles and rules cannot on their own ensure compliance and accountability The liberty

deficit of the UN and of other international organisations thus remains an urgent legal and political problem Some solutions may be available indeed recent state and institutional practice offers interesting examples in this respect But at a fundamental level we need to ask ourselves whether judged on the basis of the principle of liberty the power shift from states to international organisations is always beneficial

Built around three critical themes in international relations: peace and security, human rights and humanitarian affairs, and sustainable human development, the eighth edition of *The United Nations and Changing World Politics* guides students through the seven turbulent decades of UN politics. This new edition is fully revised to incorporate recent developments on the international stage, including new peace operations in Mali and the Central African Republic, ongoing UN efforts to manage the crises in Libya, Syria, and Iraq, the Iran Nuclear Deal, and the new Sustainable Development Goals. The authors discuss how international law frames the controversies at the UN and guides how the UN responds to violence and insecurity, gross violations of human rights, poverty, underdevelopment, and environmental degradation. Students of all levels will learn that the UN is a complex organization comprised of three interactive entities that cooperate and also compete with each other to define and advance the UN's principles and purposes.
