patterns By investigating the processes of the U S and German adjustments the author critically reconsiders the prevalent paradigms of political economy and comes to the conclusion that the evidence does not confirm the neoliberal paradigm In order to better account for the recomposition of new market relations which the author terms converging but non liberal and diverging but not predetermined markets he proposes an alternative model of politics among reflexive agents emphasizing different kinds of problem solving practices among those reflexive agents He argues that different forms and regimes of market are established in the process of recomposition in which agents reflect upon not only market rationality but also upon their own institutions creating new norms *The British Library General Catalogue of Printed Books to 1975* British Library,1984 *Catalogue of Printed Books* British Museum.
