Seeing Solutions:

Handing Over Barry Mason, 2018-05-30 This book is about that idea and how it can be used to develop consistency across shifts in residential and health settings. It demonstrates that passing information productively from one shift to another is not about the information itself but about the context in which the passing takes place. [The Porous Medium Equation](#) Juan Luis Vazquez, 2007 The Heat Equation is one of the three classical linear partial differential equations of second order that form the basis of any elementary introduction to the area of PDEs and only recently has it come to be fairly well understood. In this monograph aimed at research students and academics in mathematics and engineering as well as engineering specialists, Professor Vazquez provides a systematic and comprehensive presentation of the mathematical theory of the nonlinear heat equation usually called the Porous Medium Equation (PME). This equation appears in a number of physical applications such as to describe processes involving fluid flow, heat transfer or diffusion. Other applications have been proposed in mathematical biology, lubrication, boundary layer theory and other fields. Each chapter contains a detailed introduction and is supplied with a section of notes providing comments, historical notes or recommended reading and exercises for the reader.

Lessons in Leadership Eileen Milner, Paul Joyce, 2012-10-02 Using international case study material, this book examines how ideas of visionary leadership have been developed and discusses their applicability to the public sector. The book covers the tensions that can arise between administrative/bureaucratic traditions and the leadership styles required today, the relationship between political leadership and organizational leadership, different approaches that have been adopted by public service leaders in organizations around the globe and their level of success, the extent to which existing theories of leadership are appropriate for a new management context. A welcome addition to the current literature, this book will be invaluable reading for students of public administration as well as practitioners and policy makers in the public services.

The Difference Scott E. Page, 2008-08-11 In this landmark book, Scott Page redefines the way we understand ourselves in relation to one another. *The Difference* is about how we think in groups and how our collective wisdom exceeds the sum of its parts. Why can teams of people find better solutions than brilliant individuals working alone? And why are the best group decisions and predictions those that draw upon the very qualities that make each of us unique? The answers lie in diversity, not what we look like outside but what we look like within our distinct tools and abilities. *The Difference* reveals that progress and innovation may depend less on lone thinkers with enormous IQs than on diverse people working together and capitalizing on their individuality. Page shows how groups that display a range of perspectives outperform groups of like-minded experts. Diversity yields superior outcomes, and Page proves it using his own cutting-edge research. Moving beyond the politics that cloud standard debates about diversity, he explains why difference beats out homogeneity, whether you're talking about citizens in a democracy or scientists in the laboratory. He examines practical ways to apply diversity's logic to a host of problems and, along the way, offers fascinating and surprising examples from the

redesign of the Chicago El to the truth about where we store our ketchup Page changes the way we understand diversity how to harness its untapped potential how to understand and avoid its traps and how we can leverage our differences for the benefit of all

The Ghost in My Brain

Clark Elliott, 2016-05-31 The dramatic story of one man's recovery offers new hope to those suffering from concussions and other brain traumas. In 1999 Clark Elliott suffered a concussion when his car was rear-ended. Overnight his life changed from that of a rising professor with a research career in artificial intelligence to a humbled man struggling to get through a single day. At times he couldn't walk across a room or even name his five children. Doctors told him he would never fully recover. After eight years the cognitive demands of his job and of being a single parent finally became more than he could manage. As a result of one final effort to recover he crossed paths with two brilliant Chicago area research clinicians: one an optometrist emphasizing neurodevelopmental techniques, the other a cognitive psychologist working on the leading edge of brain plasticity. Within weeks the ghost of who he had been started to re-emerge. Remarkably Elliott kept detailed notes throughout his experience from the moment of impact to the final stages of his recovery, astounding documentation that is the basis of this fascinating book. The Ghost in My Brain gives hope to the millions who suffer from head injuries each year and provides a unique and informative window into the world's most complex computational device: the human brain.

Innovation and Entrepreneurship Ralph F. Brueggemann, Charles H. Matthews, 2015-03-12 This book presents a new model: the competency framework for students, innovators, entrepreneurs, managers, and anyone who wants to better understand the dynamic world of innovation and entrepreneurship. Focused on both the individual and strategic organizational level, this book is about people and the competencies each person needs to learn to be successful in creating a more dynamic future. Matthews and Brueggemann's framework for innovation and entrepreneurship competencies empowers individuals to excel at innovation and new venture creation. It provides a practical guide and clear and concise understanding of the knowledge, skills, attitudes, and experiences that are needed to increase imagination, creativity, innovation, and new venture creation capability. Innovation and Entrepreneurship will be attractive for students of entrepreneurship, innovation management, and cross-disciplinary classes such as design thinking. Presented in a modular format, Innovation Entrepreneurship informs the future direction of people and technology as well as the educational systems producing the next generation of innovators and entrepreneurs. Based on extensive academic research, this book is organized into two sections: Twelve innovation elements and twelve competency categories. The elements are the foundation, and the competency categories are the building blocks that inform our path toward a more precise understanding of how innovation and entrepreneurship plays an important role in economic development and our daily lives.

Strategic Curriculum Change in Universities Paul Blackmore, Camille B. Kandiko, 2012-06-25 The curriculum is a live issue in universities across the world. Many stakeholders: governments, employers, professional and disciplinary groups, and parents express strong and often conflicting views about what higher education should achieve for its students. Many universities are reviewing their curricula at an institutional level, aware that they are in a competitive climate in which league tables encourage students to see themselves as consumers and the university as a product or even a brand. The move has prompted renewed concern for some central educational questions.

about both what is learnt and how Strategic Curriculum Change explores the ways in which major universities across the world are reviewing their approaches to teaching and learning It unites institution level strategy with the underlying educational issues The book is grounded in a major study of curriculum change in over twenty internationally focused research intensive universities in the UK US Australia The Netherlands South Africa and Hong Kong Chapters include Achieving curriculum coherence Curriculum design and delivery as social practice Assessment in curriculum change The whole of institution curriculum renewal undertaken by the University of Melbourne 2005 2011 The physical and virtual environment for learning People and change Academic work and leadership This book presents a theorised and contextualised approach to the study of the curriculum and carries on much needed research on the curriculum in higher education It is an essential for the collection of all academics at university level and those involved in policy making quality assurance and enhancement
