Seeing Stars:

Seeing Stars Dennis J. Frost, 2020-03-17 In *Seeing Stars* Dennis J. Frost traces the emergence and evolution of sports celebrity in Japan from the seventeenth through the twenty first centuries Frost explores how various constituencies have repeatedly molded and deployed representations of individual athletes revealing that sports stars are socially constructed phenomena the products of both particular historical moments and broader discourses of celebrity Drawing from media coverage biographies literary works athletes memoirs bureaucratic memoranda interviews and films Frost argues that the largely unquestioned mass of information about sports stars not only reflects but also shapes society and body culture He examines the lives and times of star athletes including sumo grand champion Hitachiyama female Olympic medalist Hitomi Kinue legendary pitcher Sawamura Eiji and world champion boxer Gushiken Yoko demonstrating how representations of such sports stars mediated Japan's emergence into the putatively universal realm of sports unsettled orthodox notions of gender facilitated wartime mobilization of physically fit men and women and masked lingering inequalities in postwar Japanese society As the first critical examination of the history of sports celebrity outside a Euro American context this book also sheds new light on the transnational forces at play in the production and impact of celebrity images and dispels misconceptions that sports stars in the non West are mere imitations of their Western counterparts

Seeing Stars C. R. Kitchin, Robert W. Forrest, 2012-12-06 *Seeing Stars* is written for astronomers regardless of the depth of their theoretical knowledge who are taking their first steps in observational astronomy Chris Kitchin and Bob Forrest both professional astronomers take a conducted tour of the night sky and suggest suitable observing programmes for everyone from beginners to experts How is this book different We are all familiar with the beautiful images of planets and galaxies obtained by spacecraft and giant telescopes but what can you really see with a small telescope What should you expect from a small refractor or reflector And what is the effect of observing from a site near a city The answers are all here with many photographs that will illustrate exactly what can be seen with different instruments everything from the naked eye to a 300mm telescope and from different locations
