Seeing Things Television In An Age Of Uncertainty:

Seeing Things John Ellis, Television the author argues responds to two powerful desires of our age it makes us witnesses of often traumatic events and it tries and fails to provide us with narratives that make sense of the world The author makes sense of modern television both by exploring its processes and in terms of its dynamic relationships with the cultures that provide it with raw material Television he proposes offers us multiple ways of understanding the world yet does not arbitrate between them He explores this process as one of working through whereby television news takes in the chaos and conflict of the world and subsequent programmes of all kinds offer diverse ways of unravelling its confusions from the psychobabble of talk shows to the open narratives of soaps documentaries and dramas By means of this working through problems are exhausted rather than resolved The author demonstrates how television s function in its new era is no longer that of building consensus rather it uses all the means at its disposal including sophisticated computer graphics to mediate between conflicting approaches to our age of uncertainty

Docudrama on European Television Tobias Ebbrecht-Hartmann, Derek Paget, 2016-07-12. This book explores docudrama as a creative response to troubled times. With generic characteristics formed via traditions in theatre as well as film and with claims to fact underscored by investigative journalism, television docudrama examines key events and personalities in unfolding national histories. Post-Fall of the Berlin Wall, docudrama has become a means for nations to work through traumatic experiences both within national borders and Europe-wide. In this regard, it is an important genre for television networks as they attempt to make sense of complex current events. These authors offer a template for further study and point towards ways in which European television cultures beyond those discussed here might be considered in the future.
