**Seeking a Richer Harvest** Tina Thurston,Christopher T Fisher,2006-11-25 Subsistence intensification innovation and change have long figured prominently in explanations for the development of social complexity among foragers and horticulturalists and the rise of chiefly societies and archaic states yet there is considerable debate over the actual mechanisms that promote these processes Traditional approaches to the intensification question emphasize population pressure climate change bureaucratic management or even land degradation as prerequisites for the onset of new or changing strategies or the construction and maintenance of agricultural landscapes Most often these factors are modeled as external forces outside the realm of human decision making but recent archaeological research presents an alternative to this suggesting that subsistence intensification is the result of human driven strategies for power prestige and status stemming from internal conditions within a group When responding to environmental adversity human groups were less frequently the victims as they have been repeatedly portrayed Instead human groups were often vigorous actors responding

with resilience ingenuity and planning to flourish or survive within dynamic and sometimes unpredictable social and natural milieux

*Seeking Truth and Speaking Truth* Robert George,2025-07-08 A wide ranging collection of essays from one of America s leading public intellectuals In *Seeking Truth and Speaking Truth* acclaimed political philosopher and legal scholar Robert P George tackles one of the most vexing issues dividing Americans today He argues that the Age of Faith of the Medieval period and the Age of Reason of the European Enlightenments have been followed by a modern Age of Feeling in which people derive their beliefs not from faith or reason or faith and reason but from emotion which becomes the central source of truth And so many have embraced a fierce moral absolutism on the basis of beliefs that are the products of nothing more than subjective inclinations and experiences This collection of essays challenges the Age of Feeling by appealing to reason in

the pursuit of sound moral understanding on crucial and contentious topics of human dignity the definition of marriage philosophy of law constitutional law the nature of civil liberties free markets and others Robert George has taught generations of students at Princeton University and Harvard Law School and he has long proclaimed that a teacher's sacred mission is to form his students to be determined truth seekers and courageous truth speakers In *Seeking Truth and Speaking Truth* he shows us how it is done

Konrad, 2008-08-01 The last survey of the rent seeking literature took place more than a decade ago Since that time a great deal of new research has been published in a wide variety of journals covering a wide variety of topics The scope of that research is such that very few researchers will be familiar with more than a small part of contemporary research and very few libraries will be able to provide access to the full breadth of that research This two volume collection provides an extensive overview of 40 years of rent seeking research The volumes include the foundational papers many of which have not been in print for two decades They include recent game theoretic analyses of rent seeking contests and also applications of the rent seeking concepts and methodology to economic regulation international trade policy economic history political competition and other social phenomena The new collection is more than twice as large as any previous collection and both updates and extends the earlier surveys Volume I contains previously published research on the theory of rent seeking contests which is an important strand of contemporary game theory Volume II contains previously published research that uses the theory of rent seeking to analyze a broad range of public policy and social science topics The editors spent more than a year assembling possible papers and although the selections fill two large volumes many more papers could have been included
