Addiction and Social Behaviors in the Post-Pandemic World Iina Savolainen,Nicholas Kerry ,Anu Sirola,2024-11-15

Gambling and gaming are popular past time activities that involve social elements The built in social features of online games and gambling platforms offer users valuable social interactions and can function as protective factors against gambling and gaming harms However being socially motivated to gamble or stay within online games might lead to spending excessive time gaming or gambling often at the expense of other important routines and daily activities Together these factors might lead to gambling and gaming related problems and long term individual and public health harms Problem gambling is typically associated with other harmful behaviors including alcohol use and cigarette smoking while online gaming disorder has been associated with poor diet and sleep quality Since its beginning in the early 2020 the COVID 19 pandemic has challenged people s everyday lives wellbeing and social interactions Especially during the early stages of the pandemic many quarantined at home and stayed socially isolated from others At that time the World Health Organization together with various gaming companies launched the PlayApartTogether initiative to promote well being and encourage people to stay

socially connected through virtual play Going into the third year of the pandemic people are still adjusting to and living in the so called new normal where many social conventions have changed This inevitably influences people s health related and addictive behaviors and choices
