area include the evolution of integrated regional trading blocs the informal economy and the destruction of the productive potential that has had a serious social cultural and environmental impact The volume refuses to impose a traditional and uncritical linear historical narrative onto the reader and instead proposes an alternative interpretation of the past and its relation to the present **Government-Linked Companies and Sustainable, Equitable Development** Terence

Gomez,François Bafoil,Kee-Cheok Cheong,2014-11-27 The debate over how far governments should intervene in economies in order to promote economic growth a debate which from the 1980s seemed settled in favour of the neo liberal non interventionist consensus has taken on new vigour since the financial crisis of 2008 and after Some countries most of them in industrialised Asia have survived the crisis and secured equitable economic growth by adopting a developmental state model whereby governments have intervened in their economies often through explicit support for individual companies This book explores debates about government intervention assesses interventionist policies including industrial and innovation policies and examines in particular the key institutions which play a crucial role in implementing government policies and in building the bridge between the state and the private sector The countries covered include China India South Korea Malaysia and Taiwan together with representative countries from Europe and Latin America **The Palgrave Handbook of**

Development Economics Machiko Nissanke,José Antonio Ocampo,2019-08-12 This Handbook responds to the needs and aspirations of current and future generations of development economists by providing critical reference material alongside or in relation to mainstream propositions Despite the potential of globalisation in accelerating growth and development in low and middle income countries through the spread of technology knowledge and information its current practice in many parts of the world has led to processes that are socially economically and politically and ecologically unsustainable It is critical for development economists to engage with the pivotal question of how to change the nature and course of globalisation to make it work for inclusive and sustainable development Applying a critical and pluralistic approach the chapters in this Handbook examine economics of development paths under globalisation focusing on sustainable development in social environmental institutional and political economy dimensions It aims at advancing the frontier of development economics in these key aspects and generating more refined policy perspectives It is critically reflective in examining effects of globalisation on development paths to date and in terms of methodological and analytical approaches as well as forward thinking in policy perspectives with a view to laying a foundation for sustainable development OECD Economic Surveys: South Africa 2008

OECD,2008-07-15 OECD s first review of South Africa s economy After a general overview of recent economic developments and programmes this survey examines key challenges including reforming goods and services markets and realising South Africa s employment Regional Financial Cooperation Jose Antonio Ocampo,2007-08-29 A Brookings Institution Press and Economic Commission for Latin America and the Caribbean ECLAC publication Using the experience of postwar Western Europe as a benchmark Jos Antonio Ocampo and his colleagues assess how regional financial institutions can help developing

countries often at a disadvantage within the global financial framework finance their investment needs counteract the volatility of private capital flows and make their voices heard The 1997 Asian financial crisis generated extensive debate on the international financial architecture Through this discussion it became clear that services by financial institutions including adequate mechanisms for preventing and managing financial crises and instruments for safeguarding global macroeconomic and financial stability are undersupplied Furthermore private international capital markets provide finance to developing countries in a way that effectively reduces the ability of those nations to undertake countercyclical macroeconomic policies International capital markets ration out many developing countries particularly the poorest from private global capital markets While these deficiencies in the financial architecture are clear the post 1997 debate has done little to evaluate the role that regional institutions could play in improving global financial arrangements Regional Financial Cooperation aims to fill that important gap Contributors include Ernest Aryeetey Institute of Statistical Social and Economic Research University of Ghana Georges Corm Saint Joseph University Beirut Roy Culpeper North South Institute Ottawa Ana Teresa Fuzzo de Lima Institute of Development Studies University of Sussex Stephany Griffith Jones Institute of Development Studies University of Sussex Julia Leung Hong Kong Monetary Authority Jos Luis Machinea ECLAC Jae Ha Park Korean Institute of Finance Yung Chul Park Korea University Fernando Prada FORO Nactional International Lima Guillermo Rozenwurcel School of Politics and Government University of San Martin Argentina
