En esta economía de carácter preponderantemente inmaterial donde el conocimiento y la información se erigen en mercancías de consumo, adquieren una gran importancia los procesos de información y comunicación mediante internet por donde discurre actualmente todo tipo de relaciones humanas. La interconexión que generan estas tecnologías permite también considerar la producción de información y conocimiento como una empresa colectiva, es decir, como una actividad en la que participa de manera formal o informal institucionalizada o no cualquier individuo de cualquier parte del planeta. Tales transformaciones producen una alteración en las relaciones de poder que se refleja en la inversión de la jerarquía de los saberes y en el cuestionamiento del papel de las universidades en la formación para el empleo y como generadora de conocimiento. En la medida en que se pueda explotar económicamente y producir beneficios. Como otros estudios superiores también los estudios jurídicos están llamados a adaptarse a las exigencias de esta nueva economía lo que no ocurre de forma espontánea sino que requiere a su vez que los Estados realicen cambios en su política educativa pero también en su política económica. De esta forma la política la economía y el método de conocimiento jurídico teórico o práctico investigador o dirigido al aprendizaje quedan interconectados en un tipo de relaciones cuyos retos y servidumbres son analizados por los trabajos que se recogen en este volumen. *Boletín Mexico. Acompañados de la Gran Recesión, la pandemia de la COVID-19 y los diferentes conflictos bélicos, los países de ingreso mediano tampoco logran un crecimiento estable de sus economías a largo plazo. La industria española no es ajena a este fenómeno. Con el respaldo europeo, el Gobierno de España puso en marcha en 2021 un
