

The background of the book cover is a classical landscape painting. In the foreground, there is a dense forest of tall, slender trees, possibly cypresses, with dark green foliage. A path or stream winds through the trees. In the middle ground, a large, multi-story castle or manor house with a red-tiled roof and several towers sits atop a hill. The castle is partially obscured by the trees. In the background, there are rolling green hills and a cloudy sky. The overall style is reminiscent of 19th-century landscape art.

High German which brings to light numerous differences between these two closely related languages The study s innovative approach relies on translated texts which allows the authors to tackle the problem of the apparent incomparability of OE and OHG textual records and to identify the areas of OE and OHG syntax potentially influenced by the Latin source texts This is especially important from the point of view of OE research where Latin is rarely considered to be a significant variable The book s profile and content is of direct interest to historical linguists working on OE and or OHG and Old Germanic languages in general but it can also greatly benefit several other groups of researchers scholars applying corpus methods to the study of dead languages historical linguists generally linguists researching element order as well as specialists in translation studies
