Rethinking World Politics Philip G. Cerny, 2010-03-24 Rethinking World Politics is a major intervention into a central debate in international relations how has globalization transformed world politics Most work on world politics still presumes the following in domestic affairs individual states function as essentially unified entities and in international affairs stable nation states interact with each other In this scholarship the state lies at the center it is what politics is all about However Philip Cerny contends that recent experience suggests another process at work transnational neopluralism In the old version of pluralist theory the state is less a cohesive and unified entity than a varyingly stable amalgam of competing and cross cutting interest groups that surround and populate it Cerny explains that contemporary world politics is subject to similar pressures from a wide variety of sub and supra national actors many of which are organized transnationally rather than nationally In recent years the ability of transnational governance bodies NGOs and transnational firms to shape world politics has steadily grown Importantly the rapidly growing transnational linkages among groups and the emergence of increasingly influential even powerful cross border interest and value groups is new These processes are not replacing nation states but they are forging new transnational webs of power States he argues are themselves increasingly trapped in these webs After mapping out the dynamics behind contemporary world politics Cerny closes by prognosticating where this might all lead Sweeping in its scope Rethinking World Politics is a landmark work of international relations theory that upends much of our received wisdom about how world politics works and offers us new ways to think about the forces shaping the contemporary world

Environmental Security Rita Floyd, Richard Matthew, 2013-01-04 Economic development population growth and poor resource management have combined to alter the planet's natural environment in dramatic and alarming ways For over twenty years considerable research and debate have

focused on clarifying or disputing linkages between various forms of environmental change and various understandings of security. At one extreme lie sceptics who contend that the linkages are weak or even non-existent; they are simply attempts to harness the resources of the security arena to an environmental agenda. At the other extreme lie those who believe that these linkages may be the most important drivers of security in the 21st century; indeed the very future of humankind may be at stake. This book brings together contributions from a range of disciplines to present a critical and comprehensive overview of the research and debate linking environmental factors to security. It provides a framework for representing and understanding key areas of intellectual convergence and disagreement, clarifying achievements of the research as well as identifying its weaknesses and gaps. Part I explores the various ways environmental change and security have been linked and provides principal critiques of this linkage. Part II explores the linkage through analysis of key issue areas such as climate change, energy, water, food, population and development. Finally, the book concludes with a discussion of the value of this subfield of security studies and with some ideas about the questions it might profitably address in the future. This volume is the first to provide a comprehensive overview of the field. With contributions from around the world, it combines established and emerging scholars to offer a platform for the next wave of research and policy activity. It is invaluable for both students and practitioners interested in international relations, environment studies and human geography.

Security and Environment in the Mediterranean Hans Günter Brauch, Peter H. Liotta, Antonio Marquina, Paul F. Rogers, Mohammad El-Sayed Selim, 2012-12-06. In this volume, security specialists, peace researchers, environmental scholars, demographers as well as climate, desertification, water, food and urbanisation specialists from the Middle East and North Africa, Europe and North America review security and conflict prevention in the Mediterranean. They also analyse NATO's Mediterranean security dialogue and offer conceptualisations on security and perceptions of security challenges as seen in North and South. The latter half of the book analyses environmental security and conflicts in the Mediterranean and environmental consequences of World War II, the Gulf War, the Balkan wars and the Middle East conflict. It also examines factors of global environmental change, population growth, climate change, desertification, water scarcity, food and urbanisation issues as well as natural disasters. Furthermore, it draws conceptual conclusions for a fourth phase of research on human and environmental security and peace as well as policy conclusions for cooperation and partnership in the Mediterranean in the 21st century.

Corporate Security Surveillance Richard J. Chasdi, 2024-03-05. In a world of globalization and technological change, terrorism continues to pose grave threats not only to more traditional targets such as civilians and government targets but, according to many experts, increasingly to multinational corporations and other international economic enterprises. This book broadens the understanding of the threats posed to the private sector, thereby helping business executives in charge of security affairs prepare for new threats and unconventional threats in a continuously evolving world. Chasdi's Terrorist Assault Business Vulnerability Index (TABVI) now provides C-class executives with a way to measure potential host country

and host country industry vulnerability and thus contributes a critical new standard to help appraise where and when MNCs and other international enterprises should marshal Foreign Direct Investment FDI and other resources In addition his statistical findings about different country operational environments work to frame TABVI findings and provide in depth understandings of risk in several different potential host countries While the focus is on traditional terrorist groups and criminal syndicalist organizations that use terrorism in particular developing world host countries Chasdi s research also informs the business community about the context of political issues of contention defined by terrorist groups and their constituent supporters Business leaders government officials at national and local government levels the academic community and the media benefit from ideas proposed in this book Brian M Jenkins writes a carefully reasoned comprehensive and insightful Foreword that describes the importance of this topic about Chasdi he writes I am an admirer of his uniquely imaginative approaches and always rigorous analysis His work is invariably intellectually challenging and thought provoking Read on *Contemporary Conflict Resolution* Oliver Ramsbotham, Tom Woodhouse, Hugh Miall, 2005-12-08 Offering an assessment of the theory and practice of conflict resolution in post Cold War conflicts this book addresses a number of questions It explores the nature of contemporary conflict and the development of conflict resolution

be of use to anyone studying vulnerability and violence and their relation to contemporary globalisation

Pockets of resistance Piers Robinson, Peter Goddard, Katy Parry, Craig Murray, 2013-01-18 For scholars of media and war the 2003 invasion of Iraq is a compelling case to study As part of President Bush's war on terror the invasion was the most controversial British foreign policy decision since Suez and its ramifications and aftermath have rarely been far from the news In the many political and public debates regarding this conflict arguments over the role of the media have been omnipresent For some media coverage was biased against the war for others it became a cheerleader for the invasion Where does the truth lie Drawing upon a uniquely detailed and rich content and framing analysis of television and press coverage and on interviews with some of the journalists involved Pockets of Resistance provides an authoritative assessment of how British news media reported the 2003 Iraq invasion and also of the theoretical implications of this case for our understanding of wartime media state relations Pockets of Resistance examines the successes and failures of British television news as it sought to attain independence under the difficult circumstances of war and describes and explains the emergence of some surprisingly vociferous anti war voices within a diverse national press
