

A large, weathered stone tablet stands upright in a vast desert landscape. The tablet is covered in ancient, stylized script, possibly cuneiform or a similar early writing system. The desert floor is composed of sand with distinct, wavy ripples. In the background, there are rolling sand dunes under a bright blue sky with wispy white clouds. The overall scene conveys a sense of mystery and discovery.

Extinct Languages Johannes Friedrich, 2021-10-26 A noted linguist examines extinct languages from Egyptian hieroglyphs to the mysteries of as yet undeciphered writings in this scholarly work While certain ancient languages were passed down continuously through the ages many others were ignored for centuries When scholars began to decipher these extinct languages in the early nineteenth century they uncovered previously inaccessible riches of knowledge and history Yet much work remains to be done on undeciphered scripts that continue to tantalize and perplex us today In Extinct Languages linguist Johannes Friedrich guides readers through the fascinating world of recovered systems of writing including Egyptian and Hittite hieroglyphs Babylonian cuneiform and others He also explains the methodology and principles behind the deciphering process that will one day crack ancient mysteries such as the Indus Valley script **Endangered Languages**

Sarah G. Thomason, 2015-04-23 Most of the 7 000 languages spoken in the world today will vanish before the end of this century taking with them cultural traditions from all over the world as well as linguistic structures that would have improved our understanding of the universality and variability of human language This book is an accessible introduction to the topic of language endangerment answering questions such as what is it How and why does it happen Why should we care The book outlines the various causes of language endangerment explaining what makes a language safe and highlighting the danger signs that threaten a minority language Readers will learn about the consequences of losing a language both for its former speech community and for our understanding of human language Illustrated with case studies it describes the various methods of documenting endangered languages and shows how they can be revitalised Lessons from Documented

Endangered Languages K. David Harrison, David S. Rood, Arienne Dwyer, 2008-09-11 This volume represents part of an unprecedented and still growing effort to advance coordinate and disseminate the scientific documentation of endangered languages As the pace of language extinction increases linguists and native communities are accelerating their efforts to speak remember record analyze and archive as much as possible of our common human heritage that is linguistic diversity The window of opportunity for documentation is narrower than the actual lifetime of a language and is now rapidly closing for many languages represented in this volume The authors of these papers unveil newly collected data from previously poorly known and endangered languages They organize highly complex linguistic facts paradigms affixes vowel patterns while pointing out the theoretically challenging aspects of these Beyond this they reflect on the social and human dimensions discussing particular problems of nostalgia and modernity memory and forgetting and obsolescence and ethics while viewing language as not merely data on a page but as a living creation in the minds and mouths of its speakers **Lost Languages**

from the Mediterranean Jan G. P. Best, Fred C. Woudhuizen, 1989 Endangered Languages in the 21st Century Eda Derhemi, Christopher Moseley, 2023-02-24 Endangered Languages in the 21st Century provides research on endangered languages in the contemporary world the challenges still to be faced the work still to be done and the methods and practices

that have come to characterize efforts to revive and maintain disadvantaged indigenous languages around the world. With contributions from scholars across the field, the book brings fresh data and insights to this imperative but still relatively young field of linguistics. While the studies acknowledge the threat of losing languages in an unprecedented way, they focus on cases that show resilience and explore paths to sustainable progress. The articles are also intended as a celebration of the 25 years' work of the Foundation for Endangered Languages and as a parting gift to FEL's founder and quarter-century chair Nick Ostler. This book will be informative for researchers, instructors, and specialists in the field of endangered languages. The book can also be useful for university graduate or undergraduate students and language activists. Creating Orthographies for Endangered Languages Mari C. Jones, Damien Mooney, 2017-08-31
Creating an orthography is often seen as a key component of language revitalisation. Encoding an endangered variety can enhance its status and prestige. In speech communities that are fragmented dialectally or geographically, a common writing system may help create a sense of unified identity or help keep a language alive by facilitating teaching and learning. Despite clear advantages, creating an orthography for an endangered language can also bring challenges, and this volume debates the following critical questions: whose task should this be, that of the linguist or the speech community? Should an orthography be maximally distanced from that of the language of wider communication for ideological reasons, or should its main principles coincide for reasons of learnability? Which local variety should be selected as the basis of a common script? Is a multilectal script preferable to a standardised orthography? And can creating an orthography create problems for existing native speakers?

Language Diversity Endangered Matthias Brenzinger, 2015-07-31
This book presents a comprehensive overview of endangered languages with a global coverage. It features such well-known specialists as Michael Krauss, Willem F. H. Adelaar, Denny Moore, Colette Grinevald, Akira Yamamoto, Roger Blench, Bruce Connell, Tapani Salminen, Olga Kazakevich, Aleksandr Kibrik, Jonathan Owens, David Bradley, George van Driem, Nicholas Evans, Stephen A. Wurm, Darrell Tryon, and Matthias Brenzinger. The contributions are unique in analysing the present extent and the various kinds of language endangerment by applying shared general indicators for the assessment of language endangerment. Apart from presenting the specific situations of language endangerment at the subcontinental level, the volume discusses major issues that bear universally on language endangerment. The actual study of endangered languages is carefully examined, for example, against the ethics and pragmatics of fieldwork. Practical aspects of community involvement in language documentation are discussed, such as the setting up of local archives and the training of local linguists. Numerous case studies illustrate different language shift environments with specific replacing factors, such as colonial and religious conquests, migrations, and governmental language education. The book is of interest to students and scholars of linguistics, with particular focus on endangered languages and their documentation, typology, and sociolinguistics.

Endangered Languages of the Caucasus and Beyond

,2016-11-01 According to UNESCO it is believed that at least half of the nearly 7 000 languages spoken around the world will cease to be used within the next 100 years If this issue is neglected people will lose not only their cultural heritage but also invaluable understandings about the history of all humankind Endangered Languages of the Caucasus and Beyond includes the manuscripts of 19 papers that were presented at the 1st International CUA Conference on Endangered Languages organized by the Caucasus University Association CUA at Ardahan Turkey on 13 to 16 October 2014 The articles address issues such as the state of the field of documentation conservation and revitalization of endangered languages with special reference to the endangered languages in the Caucasus region and beyond Endangered Languages Evangelia

Adamou,2024-08-06 A concise accessible introduction to language endangerment and why it is one of the most urgent challenges of our times 58% of the world s languages or approximately 4 000 languages are endangered When we break this figure down we realize that roughly ten percent of languages have fewer than ten language keepers And if one language stops being used every three months this means that in the next 100 years if we do nothing 400 more languages will become dormant In Endangered Languages Evangelia Adamou a specialist of endangered languages and a learner of her own community language Nashta offers a sobering look at language endangerment and what is truly lost when a language disappears from usage Combining recent advances from the Western scientific tradition from the fields of linguistics psycholinguistics neurolinguistics language attrition population genetics and natural language processing and insights from Indigenous epistemology theory and ethics Adamou examines a wealth of issues surrounding endangered languages She discusses where endangered languages are found including how they are faring in a digital world why these languages are no longer used and how communities can reclaim languages and keep them strong Adamou also explains the impact of language continuity on community and individual health and well being the importance of language transmission in cultural transmission and why language rights are essentially human rights Drawing on varied examples from the Wampanoag Nation to Wales Endangered Languages offers a powerful reminder of the crucial role every language has in the vitality and well being of individuals communities and our world Encyclopedia of the World's Endangered Languages Christopher

Moseley,2008-03-10 The concern for the fast disappearing language stocks of the world has arisen particularly in the past decade as a result of the impact of globalization This book appears as an answer to a felt need to catalogue and describe those languages making up the vast majority of the world s six thousand or more distinct tongues which are in danger of disappearing within the next few decades Endangerment is a complex issue and the reasons why so many of the world s smaller less empowered languages are not being passed on to future generations today are discussed in the book s introduction The introduction is followed by regional sections each authored by a notable specialist combining to provide a comprehensive listing of every language which by the criteria of endangerment set out in the introduction is likely to

disappear within the next few decades These languages make up ninety per cent of the world's remaining language stocks Each regional section comprises an introduction that deals with problems of language preservation peculiar to the area surveys of known extinct languages and problems of classification The introduction is followed by a list of all known languages within the region endangered or not arranged by genetic affiliation with endangered and extinct languages marked This listing is followed by entries in alphabetical order covering each language listed as endangered Useful maps are provided to pinpoint the more complex clusters of smaller languages in every region of the world The Encyclopedia therefore provides in a single resource expert analysis of the current language policy situation in every multilingual country and on every continent detailed descriptions of little known languages from all over the world and clear alphabetical entries region by region of all the world's languages currently thought to be in danger of extinction The Encyclopedia of the World's Endangered Languages will be a necessary addition to all academic linguistics collections and will be a useful resource for a range of readers with an interest in development studies cultural heritage and international affairs
