The Economics of UN Peacekeeping Nadège Sheehan, 2011-07-25 Peacekeeping is a security concept that is very representative of the current interventionism multilateralism human rights and humanitarian ideas UN peacekeeping plays an important role in international security and includes various activities that go beyond the original roles assigned to UN armed forces e.g humanitarian aid election supervision disarmament mine clearance civilian protection and peacebuilding The problem is to define the economic efficiency of these operations and to develop some recommendations in the context of

an economic globalization process Although UN peacekeeping has shortcomings it must be considered essential for organizing and defending the world politico economic order UN peacekeeping is a political activity but its production strongly depends on nations economic considerations Governments make political decisions that also take into account the economic gains they expect to obtain from their contribution to any specific mission With low means and inadequate strategies to meet the challenges UN peacekeeping must pay particular attention to resolving the problems of free riding and of prisoner s dilemma in contributions that delay deployments and create significant financial problems Understanding how peacekeeping can be most cost effectively carried out while considering the importance of legitimacy in interventions is essential This book believes that regional organizations can ease the UN s financial responsibility by managing conflicts in their regions But to be most effective they must involve the UN in their interventions This book also emphasizes UN peacekeeping trust funds as the key to better financial effectiveness It strongly recommends that NATO be empowered by the UN with the role of global peace police and proposes the establishment of a UN high ranking team of international specialists in peacekeeping issues This research should be of interest to students and researchers looking at international and political economics as well as international relations defence security and peace studies **Africa and the World**

that has by far attracted the most media attention has been the laboratory of contemporary peacekeeping combining several interesting elements. It came on the tail of a French African military intervention rehatting African contingents operated in parallel to various counterterrorism forces Barkhane and JF G5 Sahel. It has been the deadliest peace operation due to asymmetric threats but has also managed to adapt to a new environment and has witnessed a return of European troop contributors to peacekeeping in Africa but also a significant contribution from China. Most importantly MINUSMA ultimately became caught in the geopolitical crossfire with a host government led by a military junta and supported by Russia and the Wagner Group defying the Security Council in the context of a return of East West rivalries exacerbated by the 2022 Ukraine invasion.

9/11 Ten Years After Rachel E. Utley, 2016-03-16 Ten years on what have been the principal impacts of the terrorist attacks of 11 September 2001 on the external policies and international outlooks of the world's major powers, the range and scope of the international security agenda and on the capacity for states and international organisations to work together to combat the dangers of international terrorism. This book investigates a range of international responses to the events of 9/11 to evaluate their consistency over time, to analyse their long term significance and impact and to consider both their implications for the international security agenda and the prospects for international cooperation in addressing the challenges posed. In particular the book considers the perspectives of some of the world's major powers and international organisations on the question of international terrorism and on its perpetrators, comparing their interpretations and responses and examining how these have changed over the course of a decade of conflict. This book is primarily directed at an academic market and especially towards undergraduate and taught postgraduate students on courses in international politics, international relations, security studies, terrorism studies and contemporary international history.

Africa in Global International Relations Paul-Henri Bischoff, Kwesi Aning, Amitav Acharya, 2015-10-05 Recent scholarship in International Relations (IR) has started to study the meaning and implications of a non-Western world. With this comes the need for a new paradigm of IR theory that is more global, open, inclusive and able to capture the voices and experiences of both Western and non-Western worlds. This book investigates why Africa has been marginalised in IR discipline and theory and how this issue can be addressed in the context of the emerging Global IR paradigm. To have relevance for Africa, a new IR theory needs to be more inclusive, intellectually negotiated and holistically steeped in the African context. In this innovative volume, each author takes a critical look at existing IR paradigms and offers a unique perspective based on the African experience. Following on from Amitav Acharya and Barry Buzan's work *Non-Western International Relations Theory*, it develops and advances non-Western IR theory and the idea of Global IR. This volume will be of key interest to scholars and students of African politics, international relations, IR theory and comparative politics.

Russia's Military Revival Bettina Renz, 2018-04-27 Russian annexation of Crimea and the subsequent air campaign over Syria took the world by surprise. The capabilities and efficiency of Moscow's armed forces during both operations signalled to the world that Russia was back in

business as a significant military actor on the international stage In this cutting edge study Bettina Renz provides an in depth and comprehensive analysis of Russia s military revival under Putin s leadership Whilst the West must adjust to the reality of a modernised and increasingly powerful Russian military she argues that the renaissance of Russian military might and its implications for the balance of global power can only be fully understood within a wider historical context Assessing developments in Russian Great Power thinking military capabilities Russian strategic thought and views on the use of force throughout the post Soviet era the book shows that rather than signifying a sudden Russian military resurgence recent developments are consistent with longstanding trends in Russian military strategy and foreign policy

Uniting Africa David J. Francis, 2017-05-15 Plagued by bloody wars and armed conflicts political instability communal violence and displaced persons and at the mercy of natural catastrophes such as drought and famine it is not surprising that the Western press has long dismissed Africa as the hopeless continent In the face of these challenges Africa today is faced with a stark choice either unite or perish The debate on why and how the continent should unite in terms of co operative peace security and development is more urgent than at any other time in Africa s post colonial history Moving forward from the failure of the earlier typically idealistic Africa unity project David Francis demonstrates how peace and security challenges have created the imperative for change He argues that a series of regional peace and security systems are emerging and that states that have participated in practical experiments in

regional peacekeeping peace support operations conflict stabilization management and preventive diplomacy are building de facto systems of peace and security that could be institutionalized and extended

Human Security as Statecraft Nik Hynek, 2012-02-20 This book critically investigates the discourses and practices of human security and aims to delve below the stereotypical imageries representing them Drawing on Foucault and Deleuze the author approaches human security from a new perspective with the aim of ascertaining what has been behind and underneath a certain spatio temporal articulation of human security and with what political implications and consequences Each human security assemblage is composed of messy discourses and practices which are loosely related and sometimes even disconnected This book examines the Canadian and Japanese articulations of human security and establishes the kinds of structural terrains have enabled shaped or blocked the unfolding of these versions of human security The pivotal contention of the book is that Canadian and Japanese articulations of human security have been different because they have grown from completely different domestic economies of power governing the relationship between the state apparatus and the non profit and voluntary sector While the Canadian human security assemblage has been shaped by transformations in the country s advanced liberal model of government the Japanese has been shaped by the continuities of Japan s bureaucratic authoritarianism A novel approach is employed for the related process tracing a general series linking structural conditions with actual articulations of the human security projects and their further development including analysis of their unintended consequences This book will be of much interest to students of Critical Security Studies human security global governance foreign policy and IR Security studies
