Team Teaching Kathryn M. Plank, 2023-07-03 For those considering adopting team teaching or interested in reviewing their own practice this book offers an over view of this pedagogy its challenges and rewards and a rich range of examples in which teachers present and reflect upon their approaches The interaction of two teachers both the intellectual interaction involved in the design of the course and the pedagogical interaction in the teaching of the course creates a dynamic environment that reflects the way scholars make meaning of the world The process naturally breaks down the teacher centered classroom by creating a scholarly community in which teachers and students work together to understand important ideas and where students don't just learn content but begin to understand how knowledge is constructed grasp the connections between disciplines as well as their different perspectives see greater coherence in the curriculum and appreciate how having more than one teacher in the classroom leads naturally to dialogue and active learning Each of the five examples in this book shares the story of a course at a different institution and each is designed to reflect a number of

different variables in team taught courses They represent courses in a variety of different disciplines including the sciences social sciences humanities and the arts and at a range of levels from first year seminars to graduate courses They also illustrate a number of different models for instructional teams such as faculty from the same disciplines from related disciplines from two very different disciplines from different institutions and one pairing of a faculty member and a staff member This book provides insight into the impact of team teaching on student learning and on faculty development It also addresses the challenges both pedagogical and administrative that need to be addressed for team teaching to be effective

company this activity stops with the owner but the owner must understand that two heads are usually better than one The CEO and his group must not be taken over by egos the only time for pride in business is when business is doing well financially Even then business needs a lot of careful activity because pride goes before a fall It is good to entrust the CEO with the decision making responsibility but it is the biggest risk a business can take because business is a collection of ideas Therefore it a discipline of collective learning and inquiry Any student manager or business owner who wants to use participative decision making skills in his or her business or as a consultant in participative decision making should attend a workshop at least twice and read about participative decision making thoroughly and practice it from case studies
