Active Brains includes 66 cross curricular critical thinking activities that are aligned with national physical education standards. Because the activities call for common equipment and supplies that you most likely already have, your costs and prep time will be low. That prep time is further reduced by an activity finder that helps you find the appropriate activity at a glance. In each activity, kids are put in situations where they have to think critically; they learn how to think while they have fun moving. This movement learning relationship is bolstered by research showing that movement enhances comprehension. Choose from numerous ways to both prompt learning and add variety. In addition to adapting games, you'll find ideas on the following: Sequencing the activity differently; Considering the task from differing points of view; Identifying the reasoning used; Asking kids to think about their thinking processes; Figuring out what information is relevant to the task at hand. Many teachers find they have less activity time because of the No Child Left Behind legislation, and the reduced activity time doesn't help kids learn. With its high quality activities that are easy to facilitate, Active Bodies Active Brains is the perfect antidote for reduced activity time. Infused with brain compatible strategies and critical thinking challenges, this book will help students transfer the physical and thinking skills practiced and learned to other physical activities. And they'll become more physically skilled and mentally adept in the process.
