**Countervailing Forces in African-American Civic Activism, 1973-1994** Fredrick C. Harris, Valeria Sinclair-Chapman, Brian D. McKenzie, 2005-12-12 In this study assessing black civic participation after the civil rights movement Fredrick C Harris Valeria Sinclair Chapman and Brian D McKenzie demonstrate that the changes in black activism since the civil rights movement is characterized by a tug of war between black political power on one side and economic conditions in black communities on the other As blacks gain greater access and influence within the political system black participation in political activities increases while downward turns in the economic conditions of black communities produce less civic involvement in black communities Examining changes in black activism from the early 1970s to the 1990s this tug of war demonstrates that the quest for black political empowerment and the realities of economic and social life act as countervailing forces in which negative economic and social conditions in black communities weaken the capacity of blacks to organize so that their political voices can be heard

**A Nation of Emigrants** David FitzGerald, 2008-12-02 What do governments do when much of their population simply gets up and walks away In Mexico and other migrant sending countries mass emigration prompts governments to negotiate a new social contract with their citizens abroad After decades of failed efforts to control outflow the Mexican state now emphasizes voluntary ties dual nationality and rights over obligations In this groundbreaking book David Fitzgerald examines a region of Mexico whose citizens have been migrating to the United States for more than a century He finds that emigrant citizenship does not signal the decline of the nation state but does lead to a new form of citizenship and that bureaucratic efforts to manage emigration and its effects are based on the membership model of the Catholic Church

*The Image Is Everything Presidency* Gilbert St. Clair,2018-03-09 Image is everything Today our television and movie stars our athletes and our politicians carefully craft images for public consumption Even our country s Executive

Chief is not immune to a bit of image manipulation. If presidents can not always actually satisfy the public's excessive contradictory and unrealistic expectations, they can at least present a compelling image of presidential leadership and success. When it comes to the modern presidency, tennis star Andre Agassi was correct: Image is everything. Image creation is a serious business with critically important implications for the success of any politician. But presidents must be careful in deciding how they craft the ways in which we perceive them. If they are to succeed, presidents must present an appropriate image of leadership to the American people, an image that is appropriate for the particular needs of the time when the president governs and is appropriate to the personality of that president. Their ultimate goal is to convince the public that they are actually providing leadership, even if in reality they have only a limited ability to effect outcomes. This book examines the way American presidents in the media age have shaped their public personas as a means of cultivating and advancing their political and ideological agendas. Images play an important role in the perceived success or failure of our presidents. Since public expectations are most often aimed directly at the White House and its central occupant, it is more important than ever that a president control his image as well as presenting the right image to the American public. Reality thus becomes secondary and image is everything.
