The Routledge Research Companion to Planning and Culture Greg Young, 2016-03-23 It has become increasingly evident that effective planning for sustainable communities environments and economies pivots on the ability of planners to see the possibilities for culture in comprehensive social historical and environmental terms and to more fully engage with the cultural practices processes and theorisation that comprise a social formation More broadly an approach to planning theory and practice that is itself formed through a close engagement with culture is required This Research Companion brings together leading experts from around the world to map the contours of the relationship between planning and culture and to present these inextricably linked concepts and issues together in one place By examining significant trends in varying national and international contexts the contributors scrutinise the theories and practices of both planning and culture and explore not only their interface but significant divergences and tensions In doing so this collection provides the first comprehensive overview and analysis of planning and culture interdisciplinary and international in scope It is comprised of six parts organised around the themes of global and historical contexts key dimensions of planning and cultural theory and practice and cultural and planning dynamics Each section includes a final chapter that provides a case study lens which pulls the themes of the section together with reference to a significant planning issue or initiative

A Companion to Sport David L. Andrews, Ben Carrington, 2013-06-21 A Companion to Sport brings together writing by leading sports theorists and social and cultural thinkers to explore sport as a central element of contemporary culture Positions sport as a crucial subject for critical analysis as one of the most significant forms of popular culture Includes both well known social and cultural theorists whose work lends itself to an interrogation of sport and leading theorists of sport itself Offers a comprehensive examination of sport as a social and cultural practice and institution Explores sport in relation to modernity postcolonial theory gender violence race disability and politics Planet of Slums Mike Davis, 2007-09-17 According to the United Nations more than one billion people now live in the slums of the cities of the South In this brilliant and ambitious book Mike Davis explores the future of a radically unequal and explosively

unstable urban world From the sprawling barricadas of Lima to the garbage hills of Manila urbanization has been disconnected from industrialization and even from economic growth Davis portrays a vast humanity warehoused in shantytowns and exiled from the formal world economy He argues that the rise of this informal urban proletariat is a wholly unforeseen development and asks whether the great slums as a terrified Victorian middle class once imagined are volcanoes waiting to erupt

Modernization, Urbanization and Development in Latin America, 1900s - 2000s Arturo Almandoz, 2014-10-10 In this book Arturo Almandoz places the major episodes of Latin America's twentieth and early twenty first century urban history within the changing relationship between industrialization and urbanization modernization and development This relationship began in the early twentieth century when industrialization and urbanization became significant in the region and ends at the beginning of the twenty first century when new tensions between liberal globalization and populist nationalism challenge development in the subcontinent much of which is still poverty stricken Latin America's twentieth century modernization and development are closely related to nineteenth century ideals of progress and civilization and for this reason Almandoz opens with a brief review of that legacy for the different countries that are the focus of his book Mexico Chile Brazil Argentina and Venezuela but with references to others He then explores the regional distortions which resulted from the interaction between industrialization and urbanization and how the imbalance between urbanization and the productive system helps to explain why take off was not followed by the drive to maturity in Latin American countries He suggests that the close yet troublesome relationship with the United States the recurrence of dictatorships and autocratic regimes and Marxist influences in many domains are all factors that explain Latin America's stagnation and underdevelopment up to the so called lost decade of 1980s He shows how Latin America's fate changed in the late twentieth and early twenty first century when neoliberal programmes political compromise and constitutional reform dismantled the traditional model of the corporate state and centralized planning He reveals how economic growth and social improvements have been attained by politically left wing yet economically open market countries while others have resumed populism and state intervention All these trends make up the complex scenario for the new century especially when considered against the background of vibrant metropolises that are the main actors in the book

Good Cities, Better Lives Peter Hall, 2013-09-11 This book has one central theme how in the United Kingdom can we create better cities and towns in which to live and work and play What can we learn from other countries especially our near neighbours in Europe And in turn can we provide lessons for other countries facing similar dilemmas Urban Britain is not functioning as it should Social inequalities and regional disparities show little sign of going away Efforts to generate growth and spread it to the poorer areas of cities have failed dismally Much new urban development and redevelopment is not up to standard Yet there are cities in mainland Europe which have set new standards of high quality sustainable urban development This book looks at these best practice examples in Germany the Netherlands France and Scandinavia and suggests ways in which the UK and

other countries could do the same The book is in three parts Part 1 analyses the main issues for urban planning and development in economic development and job generation sustainable development housing policy transport and development mechanisms and probes how practice in the UK has fallen short Part Two embarks on a tour of best practice cities in Europe starting in Germany with the country's boosting of its cities economies moving to the spectacularly successful new housing developments in the Netherlands from there to France's integrated city transport then to Scandinavia's pursuit of sustainability for its cities and finally back to Germany to Freiburg the city that did it all Part Three sums up the lessons of Part Two and sets out the key steps needed to launch a new wave of urban development and regeneration on a radically different basis

Planning Asian Cities Stephen Hamnett,Dean Forbes,2012-03-29 Stephen Hamnett and Dean Forbes have brought together some of the region s most distinguished urbanists to explore the planning history and recent development of Pacific Asia s major cities They show how globalization and the competition to achieve global city status has had a profound effect on all these cities But how resilient are these cities to the risks that they face How can they manage continuing pressures for development and growth while reducing their vulnerability to a range of potential crises And given the tradition of top down centralized state directed planning which drove the economic growth of many of these cities in the last century what prospects are there of them becoming more inclusive and sensitive to the diverse needs of their populations and to the importance of culture heritage and local places in creating liveable cities

Shopping Malls and Public Space in Modern China Nicholas Jewell, 2016-03-03 China's rise as an economic superpower has been inescapable Statistical hyperbole has been accompanied by a plethora of highly publicized architectural forms that brand the regeneration of its increasingly globalized urban centres Despite the sizeable body of literature that has accompanied China's modernization the essence and trajectory of its contemporary cityscape remains difficult to grasp This volume addresses a less explored aspect of China's urban rejuvenation the prominence of the shopping mall as a keystone of its public spaces Here the presence of the built form most representative of Western capitalism's excess is one that makes explicit the tensions between China's Communist state and its ascent within the free market This book examines how these interrelationships are manifested in the culturally hybrid built form of the shopping mall and its role in contesting the public space of the modern Chinese city By

viewing these interrelationships as collisions of global and local narratives a more nuanced understanding of the shopping mall typology is explored Much architectural criticism has failed to address the levels of meaning implicit within the shopping mall yet it is a building type whose public popularity has guaranteed its endurance Consequently if architecture is to remain a relevant social art a more holistic understanding of this phenomenon will be indispensable to the process of adapting to globalizing forces This examination of Chinese shopping malls offers a timely and relevant case study of what is happening in all our cities today
