Making City Planning Work Allan B. Jacobs, 1978      *Making Equity Planning Work* Norman Krumholz, 2011-02-07  
Lessons from an experiment in equity planning      The Making of Urban America John William Reps, 2021-10-12 This comprehensive survey of urban growth in America has become a standard work in the field From the early colonial period to the First World War John Reps explores to what extent city planning has been rooted in the nation's tradition showing the extent of European influence on early communities Illustrated by over three hundred reproductions of maps plans and panoramic views this book presents hundreds of American cities and the unique factors affecting their development      The Oxford Handbook of Urban Planning Randall Crane, Rachel Weber, 2015 Why plan How and what do we plan Who plans for whom These three questions are then applied across three major topics in planning States Markets and the Provision of Social Goods The Methods and Substance of Planning and Agency Implementation and Decision Making      *Designing San Francisco* Alison Isenberg, 2024-09-24 A major urban history of the design and development of postwar San Francisco Designing San Francisco is the untold story of the formative postwar decades when U S cities took their modern shape amid clashing visions of the future In this pathbreaking and richly illustrated book Alison Isenberg shifts the focus from architects and city planners those most often hailed in histories of urban development and design to the unsung artists activists and others who played pivotal roles in rebuilding San Francisco between the 1940s and the 1970s Previous accounts of midcentury urban renewal have focused on the opposing terms set down by Robert Moses and Jane Jacobs put simply development versus preservation and have followed New York City models Now Isenberg turns our attention west to colorful pioneering and contentious San Francisco where unexpectedly fierce battles were waged over iconic private and public projects like Ghirardelli Square Golden Gateway and the Transamerica Pyramid When large scale redevelopment came to low rise San Francisco in the 1950s the resulting rivalries and conflicts sparked the proliferation of numerous allied arts fields and their professionals including architectural model makers real estate publicists graphic designers photographers property managers builders sculptors public interest lawyers alternative press writers and preservationists Isenberg explores how these centrally engaged arts professionals brought new ideas to city regional and national planning and shaped novel projects across urban suburban and rural borders San Francisco's rebuilding galvanized far reaching critiques of the inequitable competition for scarce urban land and propelled debates over responsible public land stewardship Isenberg challenges many truisms of this renewal era especially the presumed male domination of postwar urban design showing how women collaborated in city building long before feminism's impact in the 1970s An evocative portrait of one of the world's great cities Designing San Francisco provides a new paradigm for understanding past and present struggles to define the urban future      *Guidelines for Preparing Urban Plans* Larz Anderson, 2020-09-23 While many authors have written about what urban plans should contain and how they should be used this comprehensive book leads you step by step through the

entire plan preparation process Citing examples from across the country Larz Anderson shows how to prepare review adopt and implement urban plans He explains how to identify public needs and desires analyze existing problems and opportunities and augment long range general plans with short range district and function plans Anderson presents these guidelines as tasks For each task he explains the rationale behind it recommends a procedure for completing it and identifies the expected results Throughout Anderson encourages improvisation he urges planners to adapt the guidelines to meet local needs Excerpts from recently adopted general plans illustrate Anderson s points and provide examples of variations even within his recommendations A related glossary gives comprehensive definitions to words that though not technical have meanings specific to the urban plan

A Negotiated Landscape Jasper Rubin,2016-09-27 A Negotiated Landscape examines the transformation of San Francisco s iconic waterfront from the eve of its decline in 1950 to the turn of the millennium What was once a major shipping port is now best known for leisure and entertainment To understand this landscape Jasper Rubin not only explores the built environment but also the major forces that have been at work in its redevelopment While factors such as new transportation technology and economic restructuring have been essential to the process and character of the waterfront s transformation the impact of local grassroots efforts by planners activists and boosters have been equally critical The first edition of A Negotiated Landscape won the 2012 prize for best book in planning history from the International Planning History Society Much has changed in the five years since that edition was published For this second edition Rubin provides a new concluding chapter that updates the progress of planning on San Francisco s waterfront and examines debates over the newest visions for its development

**The Urban Design Reader** Michael Larice,Elizabeth Macdonald,2013-05-07 The second edition of The Urban Design Reader draws together the very best of classic and contemporary writings to illuminate and expand the theory and practice of urban design Nearly 50 generous selections include seminal contributions from Howard Le Corbusier Lynch and Jacobs to more recent writings by Waldheim Koolhaas and Sorkin Following the widespread success of the first edition of The Urban Design Reader this updated edition continues to provide the most important historical material of the urban design field but also introduces new topics and selections that address the myriad challenges facing designers today The six part structure of the second edition guides the reader through the history theory and practice of urban design The reader is initially introduced to those classic writings that provide the historical precedents for city making into the twentieth century Part Two introduces the voices and ideas that were instrumental in establishing the foundations of the urban design field from the late 1950s up to the mid 1990s These authors present a critical reading of the design professions and offer an alternative urban design agenda focused on vital and lively places The authors in Part Three provide a range of urban design rationales and strategies for reinforcing local physical identity and the creation of memorable places These selections are largely describing the outcomes of mid century urban design and voicing concerns over the placeless quality of contemporary urbanism The fourth part of the Reader explores key

issues in urban design and development Ideas about sprawl density community health public space and everyday life are the primary focus here Several new selections in this part of the book also highlight important international development trends in the Middle East and China Part Five presents environmental challenges faced by the built environment professions today including recent material on landscape urbanism sustainability and urban resiliency The final part examines professional practice and current debates in the field where urban designers work what they do their roles their fields of knowledge and their educational development The section concludes with several position pieces and debates on the future of urban design practice This book provides an essential resource for students and practitioners of urban design drawing together important but widely dispersed writings Part and section introductions are provided to assist readers in understanding the context of the material summary messages impacts of the writing and how they fit into the larger picture of the urban design field

**Healthy City Planning** Jason Corburn, 2013-04-12 Healthy city planning means seeking ways to eliminate the deep and persistent inequities that plague cities Yet as Jason Corburn argues in this book neither city planning nor public health is currently organized to ensure that today's cities will be equitable and healthy Having made the case for what he calls adaptive urban health justice in the opening chapter Corburn briefly reviews the key events actors ideologies institutions and policies that shaped and reshaped the urban public health and planning from the nineteenth century to the present day He uses two frames to organize this historical review the view of the city as a field site and as a laboratory In the second part of the book Corburn uses in depth case studies of health and planning activities in Rio de Janeiro Nairobi and Richmond California to explore the institutions policies and practices that constitute healthy city planning These case studies personify some of the characteristics of his ideal of adaptive urban health justice Each begins with an historical review of the place its policies and social movements around urban development and public health and each is an example of the urban poor participating in shaping and being impacted by healthy city planning

*Urban Public Policy* Martin V. Melosi, 2010-11 The 1992 Los Angeles riots catapulted the problems of the city back onto the policy agenda The cauldron of social problems of the city as the riots showed offers no simple solutions Indeed urban policy includes a range of policy issues involving welfare housing job training education drug control and the environment The myriad of local state and federal agencies only further complicates formulating and implementing coherent policies for the city This volume while not offering specific proposals to remedy the problems of the city provides a broad historical context for discussing contemporary urban policy and for arriving at new prescriptions for relieving the ills of the American city The essays address issues related to public housing poverty transportation and the environment In doing so the authors discuss larger themes in urban policy as well as provide case studies of how policies have been implemented over time in specific cities Of particular interest are two essays that discuss the role of the historian in shaping urban policy and the importance of historical preservation in urban planning

**What We See** Stephen A. Goldsmith, Lynne Elizabeth, 2010-05-01 Leading thinkers offer fresh insight into the workings of vibrant

ecological equitable communities and their economies

**Thinking Planning and Urbanism** Beth Moore

Milroy, 2010-01-01 When manufacturers and retailers vacate traditional locations they leave holes in a city's fabric that signal a shifting urban industrial terrain. Who should mend these spaces and how should they approach the problem? Using Toronto's Dundas Square and surrounding area as a case study, *Thinking Planning and Urbanism* meticulously reconstructs the redevelopment process to explore the theories and practices used. It traces the labyrinth of competing interests that can sideline and nearly overwhelm the public planning function. In these circumstances, Moore Milroy concludes, practising planners are marooned by planning theories that begin from the premise that urban space is a social construction and only secondarily a function of technology and aesthetics. This book makes plain the nature of the gap between the practice of planning and its theories, a gap that inhibits planners from effectively championing creative actions to deal with postindustrial problems. The findings drawn from this case will be widely recognized in redevelopment elsewhere and thus will be extremely useful to students and practitioners of urban design, public administration, municipal law, and urban and regional planning.

**Introduction to Planning History in the United States** Donald A. Krueckeberg, 2018-01-16 This book is an introduction to the history of the city planning profession in the United States from its roots in the middle of the nineteenth century to the present day. The work examines important questions of American planning history: Why did city planning develop in the manner it did? What did it set out to achieve and how have those goals changed? Where did planning thrive and who were its leaders? What have been the most important ideas in planning and what is their relation to thought and social development? By answering these questions, this book provides a general understanding for further study of the extensive literature of planning and urban history. Donald A. Krueckeberg divides this work into three historical periods: an initial period of independent but gradually converging concepts of a planned city; a second period of national organization, experimentation, and development; and a third period of implementation of planning ideas in nearly all levels and areas of urban policymaking. Krueckeberg begins with revealing the origins of modern planning in the movements for sanitary reform, civic art, and beautification; classical revival in civic design and neighborhood settlements; and housing reform. A second section covers the institutionalization of the profession, the rise of zoning, and comprehensive planning; influential figures of the period; and the New Communities Program of the New Deal. The book contains case studies and focuses on the role of the planner and the effectiveness of the profession. Krueckeberg concludes with a bibliography of planning history in the United States.

**The Politics of Downtown Development** Stephen J. McGovern, 2014-10-17 American cities experienced an extraordinary surge in downtown development during the 1970s and 1980s. Pro-growth advocates in urban government and the business community believed that the construction of office buildings, hotels, convention centers, and sports complexes would generate jobs and tax revenue while revitalizing stagnant local economies. But neighborhood groups soon became disgruntled with the unanticipated costs and unfulfilled promises of rapid expansion, and grassroots opposition erupted in

cities throughout the United States Through an insightful comparison of effective protest in San Francisco and ineffective protest in Washington D C Stephen McGovern examines how citizens even those lacking financial resources have sought to control their own urban environments McGovern interviews nearly one hundred business activists government officials and business leaders exploring the influence of political culture and individual citizens perceptions of a particular development issue McGovern offers a compelling explanation of why some battles against city hall succeed while so many others fail

**Portal**

John King,2023-11-07 A New York Times Book Review Editors Choice A window to the soul of a great city Inga Saffron Pulitzer Prize winning architecture critic A two time Pulitzer finalist explores the story of American urban design through San Francisco s iconic Ferry Building Conceived in the Gilded Age the Ferry Building opened in 1898 as San Francisco s portal to the world the terminus of the transcontinental railway and a showcase of civic ambition In silent films and World s Fair postcards nothing said San Francisco more than its soaring clocktower But as acclaimed architectural critic John King recounts in Portal the rise of the automobile and double deck freeways severed the city from its beloved structure and its waterfront a connection that required generations to restore King s narrative spans the rise and fall and rebirth of the Ferry Building Rich with feats of engineering and civic imagination his story introduces colorful figures who fought to preserve the Ferry Building s character and the city s soul from architect Arthur Page Brown and legendary columnist Herb Caen to poet Lawrence Ferlinghetti and Senator Dianne Feinstein In King s hands the saga of the Ferry Building is a microcosm of a larger evolution along the waterfronts of cities everywhere Portal traces the damage inflicted on historic neighborhoods and working dockyards by cars highways and top down planning and urban renewal But when an earthquake destroyed the Embarcadero Freeway city residents seized the chance to reclaim their connection to the bay Transporting readers across 125 years of history this tour de force explores the tensions impacting urban infrastructure and public spaces among them tourism deindustrialization development and globalization Portal culminates with a rich portrait of San Francisco s vibrant esplanade today visited by millions even as sea level rise and earthquakes threaten a landmark that remains as vital as ever A book for city lovers and visitors architecture fans and pedestrians Portal is essential reading for anyone interested in the history of San Francisco and the future of American cities **Professionals and Urban Form** Judith R. Blau,Mark E. La Gory,John S. Pipkin,1984-06-30 Professionals and Urban Form departs from the usual way of studying the city to examine the chief professions responsible for designing urban places planning and architecture Not often treated together they are here combined to highlight common problems and lines of convergence between the two The architects planners and social

scientists who contributed to this book concern themselves with the interconnection between knowledge and practice in planning and architecture paying particular attention to the issues of whether design knowledge and theory can or should be distinct from social science knowledge and the effects of professionalization and institutionalization on the structuring of inquiry and theory The main sections of the book deal with the history of the design professions epistemological foundations professions and practice and controversies in practice Many issues of contemporary interest to planners are dealt with including the debates over normative advocacy and communicative planning Marxist perspectives supply and demand in the job market for architects and the overarching epistemological question of the relationship between social science research and design practice     Readings in Urban Sociology Scott Elias William Bedford, 1927
