Making Connections :

Making Connections High Intermediate Teacher's Manual Kenneth J. Pakenham, 2005-07-11 The Teacher's Manual contains teaching suggestions and an answer key for the Student's Book

Making Connections, 2006-01-01 In this book comparisons are made between the practices of classrooms in a variety of different school systems around the world The abiding challenge for classroom research is the realization of structure in diversity The structure in this case takes the form of patterns of participation regularities in the social practices of mathematics classrooms The expansion of our field of view to include international rather than just local classrooms increases the diversity and heightens the challenge of the search for structure while increasing the significance of any structures once found In particular this book reports on the use of lesson events as an entry point for the analysis of lesson structure International research offers opportunities to study settings and characteristics untenable in the researcher's local situation Importantly international comparative studies can reveal possibilities for practice that would go unrecognized within the established norms of educational practice of one country or one culture Our capacity to conceive of alternatives to our current practice is constrained by deep rooted assumptions reflecting cultural and societal values that we lack the perspective to question The comparisons made possible by international research facilitate our identification and interrogation of these assumptions Such interrogation opens up possibilities for innovation that might not otherwise be identified expanding the repertoire of mathematics teachers internationally and providing the basis for theory development

Making Connections Carol Gilligan, Nona Lyons, Trudy J. Hanmer, 1990 These essays are a series of exercises en route to a new psychology of adolescence and of women and part of a process that they also describe of changing a tradition by including girls' voices of listening to girls and asking again about the meaning of self relationship and morality concepts central to any psychology of human development

Making Connections Thomas Canavan, 2011-12-15 Provides mathematical puzzles to strengthen skills in pattern recognition

Making Connections Margaret Walsh, 2017-05-15 This book argues that legal persuasion results from making and breaking mental connections To support this argument it follows a cognitive science roadmap while the authors road test

the directions through rhetorical analysis By taking a rhetorical approach to persuasion the authors are able to integrate research from cognitive science with classical and contemporary rhetorical theory and then to apply both to the taking apart and the putting together of effective legal arguments The combination of rhetorical analysis and cognitive science yields a new way of seeing and understanding legal persuasion one that promises theoretical and practical gains The work has three main functions First it brings together the leading models of persuasion from cognitive science and rhetorical theory blurring boundaries and leverage connections between the often separate spheres of science and rhetoric Second it illustrates this persuasive synthesis by working through concrete examples of persuasion from real life legal contexts In this way the book demonstrates the advantages of a deeper and more nuanced understanding of persuasion Third the volume assesses and explains why how and when certain persuasive methods and techniques are more effective than others The book is designed to appeal to scholars in law rhetoric persuasion science and psychology to students learning the practice of law and to judges and practicing lawyers who engage in persuasion

Building Communities and Making Connections Susana Rivera-Mills, Juan Antonio Trujillo, 2010-02-19 Building Communities and Making Connections explores areas of academic and community engagement through various studies that include community service learning and the development and implementation of university programs that contain a community dimension Academic endeavors have long been seen as separate from the realities of local and regional communities This book closes the gap by looking at ways in which both academia and the communities it serves can collaborate to create authentic and applied learning environments

Making Meaning by Making Connections Kathy L. Schuh, 2016-10-20 This book documents those first links that students make between content they learn in their classrooms and their prior experiences Through six late elementary school case studies these knowledge construction links are brought to life The links of the students are often rich in describing who these individuals are where they are in their learning process and what is meaningful to them Many times these links point to what has been learned both in and out of school and the contexts when and where that learning took place The mind as rhizome metaphor was used to guide the development and interpretation of the studies while the lens of Peircian semiotics provides an interpretation for these initial links The resulting grounded theory is presented through a rich and extensive presentation of excerpts from classroom observations student interviews and a student writing activity and describes the varying types of student links how the links were prompted the relationships between what the students were learning and what they already knew and specific types of in school links The narrative includes how these links were supported or inhibited in the classroom drawing on the roles of the teachers in the classrooms and what constituted authority sources of information in those classrooms Before exploring the students linking as a process of ongoing semiosis and how this process is part of a dynamic system a study of the relationship between student knowledge links and achievement is shared This rich narrative will be of interest to scholars and practitioners alike and includes an extensive appendix documenting the research methods

Making Connections Heather Devere, 2024-10-27 This book is a historical review of literature and ideas that make the connections between friendship and politics. Using pertinent quotations from a wide variety of sources, the book is divided into three main parts. Firstly, it explores interpretations of the concept of friendship, tracing its use from the Ancient Greek and Roman philosophical works through to modern and postmodern perspectives touching on different cultural, religious, and ethical connections. Secondly, the concept of the political is identified according to different aspects and ideological emphases, looking at influences in different time periods and demonstrating the importance of relational politics as viewed through feminism, identity, culture, globalism, and the ethics of care. The third part draws together the political and friendship, highlighting the importance of relational politics and civic friendship as a topic relevant for academic consideration of politics.
