Above All, Be Kind Zoe Weil, 2003-10-21 A pioneer in the humane education movement shares an essential guide for new parents who want to raise their children with genuine compassion In *Above All Be Kind* Zoe Weil teaches parents how to raise their children to be humane in the broadest sense This includes being more compassionate in their interactions with family and friends also means growing up to make life choices that demonstrate respect for the environment other species and all people The book includes chapters for early middle teenage and young adult years as well as activities issue sidebars cases tips and profiles

Life, It's All about Choices Rls, 2011-05-10 **A Primer of Judgment and Decision Making** Richard Tunney, 2024-04-15 The book is intended as a primer and discusses the main areas within judgment and decision making However these topics are not siloed Instead a narrative arc throughout the book has a higher level of critical appraisal of the key concepts and how they relate to some of the big questions about the nature of human rationality The book begins by introducing two perspectives on rationality The first describes how we decide on the goodness of a decision This is a surprisingly recent concept called Rational Choice Theory which was formed from a collection of books written around the time of the Second World War that deal with how we think about risk as a probability and goodness as utility In short Rational Choice Theory argues that to be rational people should always make the decision that maximizes

subjective expected utility The book goes on to describe the consensus view that emerged in the late 1960s and came to dominate our thinking about decision making namely that people rarely make rational decisions In fact many Nobel prizes have been handed out for work showing that humans are not rational creatures e g Daniel Kahneman Richard Thaler Robert Shiller The book concludes with recent theoretical developments in our understanding of how people make decisions that reconcile Rational Choice Theory with human irrationality Although aimed primarily at second year undergraduates studying judgement and decision making as a core component of cognitive psychology the book will also be relevant to third year electives in and MSc programmes The book will also interest undergraduates studying economics and undergraduates studying more general degrees in liberal arts or natural science As an introductory text the book assumes no prior knowledge of judgement and decision making cognitive psychology or economics However the level of the book assumes that the reader is familiar with academic texts and has experience of critical thinking A key requirement of the reader is a willingness to relate academic concepts to the real world and to try and understand the bigger picture about human psychology and its place in society

Break the Stigma: Autism Nichole E Scheerer ,April Hargreaves ,Catalina Sau Man Ng ,Matthew Daniel Lerner,2024-12-17 While awareness of neurodiversity and specific forms of neurodivergence such as autism has increased over the last few years autism stigma and prejudice against autistic people remains a critical issue that warrants further attention and investigation The experience of

stigma and prejudice such as discriminatory actions and attitudes towards autistic individuals on both a personal and public level can have many negative impacts across one's lifetime. These experiences can lead people on the autism spectrum and their families to avoid seeking help which can delay diagnosis and access to supportive services of not only autism itself but also co-occurring physical and psychological health needs. Prejudiced beliefs against autistic people may lead to many forms of discrimination including but not limited to medical education and employment discrimination. These attitudes can be built into society at a systemic level and influence policies that govern access to supports and our communities. Additionally, autism stigma and prejudice against autistic people such as stereotypical portrayals of autistic people in media and the language we use to describe autistic people can be invalidating to a person's autistic identity and to autistic culture. Further, the impacts of stigma and prejudice can be internalized by autistic individuals which may not only have poor effects on their wellbeing but also increase the want and/or need to mask or camouflage to pass as non-autistic. Masking or camouflaging can reduce a person's sense of belonging, self-esteem, sense of self-worth and close relationships, all of which are associated with poor outcomes. It can also lead to avoidance of opportunities such as connection with other autistic individuals that could increase quality of life. This Research Topic aims to showcase evidence on why the stigma surrounding autism and the prejudice against autistic people are so detrimental. It hopes to provide insights into research and interventions on how stigma and prejudice can be tackled as well as awareness, understanding and acceptance raised in the hope that the research presented will translate to best practice applications in clinical, public health, policy and community settings. We invite researchers to submit a range of articles including but not limited to original research, articles, reviews, meta-analyses, opinions, perspectives and case reports to provide new evidence on the following:

- Harmful impacts of stigma and prejudice on autistic people
- Interventions on reducing stigma surrounding and prejudice against autistic people
- Health promotion in autism: i.e. approaches that increase the mental and physical wellbeing of autistic people
- Interventions targeted at increasing understanding of autism and neurodiversity as well as increasing acceptance and advocacy of as well as allyship with autistic people
- Examining intersectionality in autism stigma and/or prejudice towards autistic people of diverse backgrounds
