Making Knowledge Visible Communicating Knowledge Through Information Products:

   Making Knowledge Visible Elizabeth Orna,2017-03-02 This ground breaking book opens up new territory for knowledge and information management The only way we can make what we know visible to other people is by putting it into Information Products the products in any medium where users meet the information they need and gain access to the knowledge of others Without them little business would get done inside organizations or between them and the outside world They are essential for the flow exchange application and preservation of information and knowledge This is the first book to make the case for the proper recognition of information products by organizations It shows how they should support business objectives and processes and be incorporated into information strategy and information architecture illustrates the value they can both add and subtract identifies the full range of stakeholders in them and argues that a triple alliance of information management information systems IT and information design is critical for successful information products Stories from real life illustrate every step of the argument The final part of the book demonstrates how an actual organization used information auditing as a tool to develop a strategic information product for an important user community

   Managing Information and Knowledge in Organizations Alistair Mutch,2008-01-15 Managing Information and Knowledge in Organizations explores the nature and place of knowledge in contemporary organizations paying particular attention to the management of information and data and to the crucial enabling role played by information and communication technology

   Facets of Knowledge Organization Alan Gilchrist,Judi Vernau,2012-03-06 The ISKO UK Biennial Conference 4th 5th July 2011 London honoured the life and achievements of Brian C Vickery This book celebrates his influence on the development of the information profession with contributions from over 50 authors to address research and developments in knowledge organization   *Smart Contracts* Marcelo Corrales Compagnucci,Mark Fenwick,Stefan Wrbka,2021-05-06 This book brings together a series of contributions by leading scholars and practitioners to examine the main features of smart contracts as well as the response of key stakeholders in technology business government and the law It explores how this new technology interfaces with the goals and content of contract law introducing and evaluating several mechanisms to improve the observability and reduce the costs of verifying contractual obligations and performance It also outlines various design patterns that ensure that end users are protected from themselves prevent cognitive accidents and translate expectations and values into more user oriented agreements Furthermore the chapters map the new risks associated with smart contracts particularly for consumers and consider how they might be alleviated The book also discusses the challenge of integrating data protection and privacy concerns into the design of these agreements and the broad range of legal knowledge and skills required The case for using smart contracts goes beyond contracts narrowly defined and they are increasingly used to disrupt traditional models of business organisation The book discusses so called decentralised autonomous organisations and decentralised finance as illustrations of this trend This book is designed for those interested in looking to deepen their
