The Evolution of the South African System of Innovation since 1916 Mario Scerri, 2009-05-27 In this book Mario Scerri provides the reader with a novel and sweeping rendition of South Africa s economic history from the early part of the twentieth century to the present He applies a broad innovation systems approach to this history spanning the period from 1916 which saw the drafting of South Africa s first Science and Technology plan to the first fourteen years of the post apartheid period The introduction of the book lays out the scope of the work and its focus on the identification of continuities and ruptures in the economic history of South Africa The first part of the book deals with the theoretical foundations of the approach The first chapter in this section looks at the emergence of evolutionary economics and innovation systems theory as the basis for the main countervailing argument against the neoclassical neoliberal orthodoxy In the course of this chapter the foundation is laid for the development of an alternative general theory of economics The second chapter covers the main debates on the economic history of South Africa and looks at the several varieties of the liberal and Marxist renditions of this history The theoretical section lays the foundation for the history that is covered in the four chapters which follow These cover three broad periods since 1916 The first runs up to 1948 with the

election victory of the National Party The second covers the apartheid period and the last follows with an account of the post apartheid political economy An endnote provides the basis for the analysis of what may possibly be the emergence of a fourth main period in the evolution of the South African system of innovation The Evolution of the South African System of Innovation since 1916 opens up a novel engagement with the complex phenomenon of apartheid its genealogy and its aftermath It will appeal to economists and economic historians who are interested in the economy of South Africa It will be of particular interest to evolutionary economists who use the systems of innovation approach as an alternative to mainstream neoclassical economics in the analysis of dynamic economic systems For this particular audience this book will provide a welcome addition to the growing body of literature in this area especially given the novelty of its historical approach

Poverty Knowledge in South Africa Grace Davie, 2015-02-05 Poverty is South Africa's greatest challenge But what is poverty How can it be measured And how can it be reduced if not eliminated In South Africa human science knowledge about the cost of living grew out of colonialism industrialization apartheid and civil resistance campaigns which makes this knowledge far from neutral or apolitical South Africans have used the Poverty Datum Line PDL Gini coefficients and other poverty thresholds to petition the state to chip away at the pillars of white supremacy and more recently to criticize the postapartheid government's failures to deliver on some of its promises Rather than promoting one particular policy solution this book argues that poverty knowledge teaches us about the dynamics of historical change the power of racism in white settler societies and the role of grassroots protest movements in shaping state policies and scientific categories Readers will gain new perspectives on today's debates about social welfare redistribution and human rights and will ultimately find reasons to rethink conventional approaches to advocacy

What is Slavery to Me? Pumla Dineo Gqola, 2010-04-01 A study of slave memory in South Africa using feminist postcolonial and memory studies Much has been made about South Africa's transition from histories of colonialism slavery and apartheid Memory features prominently in the country's reckoning with its pasts While there has been an outpouring of academic essays anthologies and other full length texts which study this transition most have focused on the Truth and Reconciliation Commission TRC What is slavery to me is the first full length study of slave memory in the South African context and examines the relevance and effects of slave memory for contemporary negotiations of South African gendered and racialised identities It draws from feminist postcolonial and memory studies and is therefore interdisciplinary in approach It reads memory as one way of processing this past and interprets a variety of cultural literary and filmic texts to ascertain the particular experiences in relation to slave pasts being fashioned processed and disseminated Much of the material surveyed across disciplines attributes to memory or popular history making a dialogue between past and present whilst ascribing sense to both the eras and their relationship In this sense then memory is active entailing a personal relationship with the past which acts as mediator of reality on a day to day basis The project studies various negotiations of raced and gendered identities in creative and other public spaces in contemporary South Africa by being particularly attentive to the encoding of consciousness about the country's slave past This book extends memory studies in South Africa provokes new lines of inquiry and develops new frameworks through which to think about slavery and memory in South Africa
