while trying to scientifically study human nature confronts us with our most vexing problem Efforts to explicate the human mind are thwarted by our cultural biases and entrenched infirmities our first person experiences as practical agents convince us that we have capacities beyond the reach of scientific explanation What we need to move forward in our understanding of human agency Paul Sheldon Davies argues is a reform in the way we study ourselves and a long overdue break with traditional humanist thinking Davies locates a model for change in the rhetorical strategies employed by Charles Darwin in On the Origin of Species Darwin worked hard to anticipate and diminish the anxieties and biases that his radically historical view of life was bound to provoke Likewise Davies draws from the history of science and contemporary psychology and neuroscience to build a framework for the study of human agency that identifies and diminishes outdated and limiting biases The result is a heady philosophically wide ranging argument in favor of recognizing that humans are like everything else subjects of the natural world an acknowledgement that may free us to see the world the way it actually is Streams of Consciousness Christopher Bollas,2024-09-26 In Christopher Bollas Streams of Consciousness a wide spectrum of theory and practice are explored sometimes appearing in simple fragments sometimes via complex lines of thinking that are developed in detail over time As Bollas revisits the received truths and dogmas of his profession including his own prejudices he demonstrates the value of open intelligent uncertainty Interspersed with clinical preoccupations which highlight the richness as well as the bewildering complexity of psychoanalysis we find other ideas that reflect his early life as political activist literature professor and cultural critic Throughout the notebooks are enriched by references to the work of numerous writers in many fields who have influenced his thinking This work is essential reading for all with an interest in psychoanalysis which will enrich both academic study and clinical practice **An Appeal from the Absurdities and Contradictions which Prevade, and Deform the Old Theory of English Grammar, to the True Constructive Principles of the English Language** James Brown (Grammarians),1850
