persons      **Challenging the Modern World** Samuel Gregg, 2002-10-01 Moral theologian Samuel Gregg addresses issues surrounding the Pope's personal influence on developments in Catholic social teaching. He compares the treatment of industrial relations, capitalism, and relations between developed and developing countries in John Paul's three social encyclicals with the handling of these three topics in the teachings of the Council and Paul VI, arguing that John Paul's critical engagement with the modern world has contributed significantly to Catholic social teaching, particularly its moral anthropological dimensions. Annotation copyrighted by Book News Inc. Portland, OR      Religion, Economics, and Public Policy Andrew D. Walsh, 2000-06-30 As Americans seem bent on dismantling the safety net of the New Deal era, the most popular version of the culture wars thesis paints an arguably cosmic battle between defenders of religious orthodoxy who embrace laissez faire capitalism and secular elites who have imposed a Marxist welfare state upon an unsuspecting populace. Walsh shows that this thesis ignores the role of religious leaders in legitimizing the types of programs embodied in America's approach to the welfare state. Walsh explores the arguments of William Jennings Bryan, America's foremost fundamentalist who opposed Social Darwinism often associated with the defense of laissez faire capitalism; John Ryan, the Catholic priest whose writings foreshadowed Roosevelt's New Deal legislation; Reinhold Niebuhr, the influential mainstream Protestant leader who defended America's Cold War strategy of containment while opposing laissez faire capitalism; and the arguments of influential African American Protestant and Jewish leaders. Finally, he looks at the role of religious leaders in the contemporary debates over issues such as health care and welfare reform. Whenever possible, the relationship between the official views of the religious leaders is analyzed in light of the opinions and voting patterns of their constituents. The opinions and voting patterns of secular Americans are also contrasted to those of religious Americans. Of particular interest to scholars, students, and general readers concerned with the role of religion in American politics      **Christ, Power and Mammon** Scott Thomas Prather, 2013-08-15 This book examines the role of the New Testament concept of the principalities and powers in the thought of Karl Barth and John Howard Yoder, showing how this biblical concept of power is central to the fundamental theological convictions of each thinker. Prather offers a scholarly account of the underexplored theological and ethical import of a major biblical theme, and the book addresses questions and concerns from a wide range of academic and lay theological interest. He brings Barth and Yoder into dialogue here and examines the three crucial areas: the confessional distinction of church and world, the demonization of political power, and the intrinsic relation between the political and economic powers. While other theologians have rightly identified a Christocentric connection between the thought of Barth and Yoder, no attempt has been made to bring them together through the sustained analysis of a single doctrinal or ethical issue. This book does just that      *Christianity and Ecological Theology* E. M. Conradie, 2006-10-01 There has been a proliferation of publications in the field of Christian ecological theology over the last three decades or so. These include a number of recent edited volumes, each covering a range of topics and consolidating many of the emerging insights in ecological theology. The

**Less Than Two Dollars a Day** Kent A. Van Til, 2007-03-02 Christian tradition demands basic sustenance for all as a human right Yet the contemporary capitalist economy makes no such demands and the free market is not designed to provide basic human sustenance As Western Christians how ought we to solve this conundrum Kent Van Til maintains that the gulf between the two calls for an alternative system of distribution In this constructively critical work Van Til takes a hard look at the realities of life in a free market system including illuminating examples from his own experience in Latin America He considers how the contemporary capitalist economy guides the distribution of goods around the world and he examines the inadequacies of this system Drawing heavily on the ideas of political theorist Michael Walzer and nineteenth century theologian statesman Abraham Kuyper Van Til proposes an alternative system of distributive justice equalizing the claims to both burdens and benefits
