Making Over Ones Self:

Creating Memory and Cultural Identity in African American Trauma Fiction Patricia San José Rico, 2019-03-19

How do contemporary African American authors relate trauma memory and the recovery of the past with the processes of cultural and identity formation in African American communities Patricia San Jos analyses a variety of novels by authors like Toni Morrison Gloria Naylor and David Bradley and explores these works as valuable instruments for the disclosure giving voice and public recognition of African American collective and historical trauma Manhood and the Making of the Military Dr Anders Ahlbäck, 2014-10-28 The creation of Finland s national conscription army in the wake of its independence from Russia in 1917 aroused intense but conflicting emotions This book examines the struggles of a new army to find popular acceptance and support and explores the ways that images of manhood were used in the controversies Ahlb ck places the situation of interwar Finland within a broad European context to reveal the conflicts surrounding compulsory military service and the impact of the Great War on masculinities and constructions of gender Speaking the Truth about Oneself Michel Foucault, 2021-10-07 Speaking the Truth about Oneself is composed of lectures that acclaimed French philosopher Michel Foucault delivered in 1982 at the University of Toronto As is characteristic of his later work he is concerned here with the care and cultivation of the self which becomes the central theme of the second and third volumes of his famous History of Sexuality published in French in 1984 the month of his death and which are explored here in a striking and typically illuminating fashion Throughout his career Foucault had always been interested in the question of how constellations of knowledge and power produce and constitute subjects But in the last phase of his life he became especially interested not only in how subjects are constituted by outside forces but in how they constitute themselves In this lecture series and accompanying seminar we find Foucault focused on antiquity starting with classical Greece the early Roman dynasties and concluding with fourth and fifth century Christian monasticism Foucault s claim is that in these periods we see the development of a new kind of act speaking the truth about oneself as the locus of a new form of subjectivity which he deemed important not just for historical reasons but also as something modernity could harness anew or adapt to its own purposes

Leadership Joseph Crawford, 2023-05 The role of a leader has changed drastically since scholars began theorizing about the modern leader Contemporary society has and is continuing to evolve Existing leadership theories need to adapt to be relevant to the expectations of leaders now That is new leadership theories emerge in their place This book presents new ideas in leadership in the 21st century context as well as new models that explain how individuals enact good leadership This book serves as an opportunity to critique or defend current understandings of leadership and propose new evidence based and theory driven insights into leadership Leadership is understood as more complex than an individual influencing another Within the broad domains of leadership there are leaders followers leadership processes followership processes teams dyads relationships and context Each of these is critical in defining what it is to be a good leader in increasingly complex

professional and personal environments This book will encourage authors to make compelling arguments not for how leadership is and has been but rather for how good leadership should be Mencian Hermeneutics Chun-chieh Huang,2019-01-22 Considered second only to Confucius in the history of Chinese thought Mencius 371 289 b c was a moral philosopher whose arguments while pragmatically rooted in the political and social conditions of his time go beyond particular situations to probe their origins and speculate on their larger implications His writings constitute a living tradition in China and the world at large Sinological studies of Mencius have long emphasized philological and archaeological research situating the texts mainly in Chinese history Critical appraisal of the texts lends itself to Western traditions of interpretation

The Nietzschean Self Paul Katsafanas,2016 Paul Katsafanas presents a clear systematic study of Nietzsche s moral psychology showing its advantages over its rivals He examines Nietzsche s accounts of conscious and unconscious of the connection between drives desires affects and values of freedom of the unity of the self and its relation to its social and historical context **Thinking with Kierkegaard** Arne Grøn,2022-12-31 Arne Grøn s reading of Søren Kierkegaard s authorship revolves around existential challenges of human identity The 35 essays that constitute this book are written over three decades and are characterized by combining careful attention to the augmentative detail of Kierkegaard s text with a constant focus on issues in contemporary philosophy Contrary to many approaches to Kierkegaard s authorship Grøn does not read Kierkegaard in opposition to Hegel The work of the Danish thinker is read as a critical development of Hegelian phenomenology with particular attention to existential aspects of human experience Anxiety and despair are the primary existential phenomena that Kierkegaard examines throughout his authorship and Grøn uses these negative phenomena to argue for the basically ethical aim of Kierkegaard s work In Grøn s reading Kierkegaard conceives human selfhood not merely as relational but also a process of becoming the self that one is through the otherness of self experience that is the body the world other people and God This book should be of interest to philosophers theologians literary studies scholars and anyone with an interest not only in Kierkegaard but also in human identity **Free Will** İlham Dilman,1999 What is the place of human free will in our lives if all our actions are the result of some other cause Does our processing unconscious beliefs or desires make us less free Is our free will necessarily restricted if we do not choose our own beliefs The debate between free will and its opposing doctrine determinism is one of the key issues in philosophy Free Will An historical and philosophical introduction provides a comprehensive introduction to this highly important question and examines the contributions made by sixteen of the most outstanding thinkers from the time of early Greece to the twentieth century Homer Sophocles Plato Aristotle St Augustine St Thomas Aquinas Descaartes Spinoza Hume Kant Schopenhauer Freud Sartre Weil Wittgenstein Moore İlham Dilman brings together all the dimensions of the problem of free will with examples from literature ethics and psychoanalysis Drawing out valuable insights from both sides of the free will determinism divide and he provides an accessible and highly readable introduction to this perennial problem **On the Knowledge of Christ Crucified** Matthew

Hale,1828 **Psychology in Nietzsche's Criticism of Religion** Jan-Olav Henriksen,2022-11-14 Friedrich Nietzsche claimed to be a psychologist This claim is substantiated in his criticism of religion In this book Jan Olav Henriksen provides new perspectives on Nietzsche s contribution to such criticism by applying elements from attachment theory and self psychology The result is that Nietzsche s insights into the problematic elements in religion point beyond what he was able to articulate based on the psychological resources available to him Henriksen sheds new light on the psychological dimensions in Nietzsche s individualism his understanding of God morality metaphysics and emotions and demonstrates how Nietzsche s criticism of religion is rooted in both psychological splitting and a profound loss of the orientational resources religion provided in his childhood **The Lady's Magazine, Or, Entertaining Companion for the Fair Sex, Appropriated Solely to Their Use and Amusement** ,1791 **Autonomy of a State in a Federation** Waseem Ahmad Sofi,2021-06-17 The book discusses the issue of autonomy in India s federal system and its precision and focused nature It inquires into the various aspects of the problem autonomy of the states and its emerging trends with special reference of Jammu and Kashmir State autonomy The book addresses many controversial unanswered question like Should India adopt and opt for dual or competitive model of federalism which has long since been discarded even in the land of its origin or should we evolve robust indigenous solutions to our problem of autonomy of States To change the metaphor do we choose a regression model or a development model of our federal polity All these discussions which deserve sustained citizen interest and national debate have been answered in the present book *Vulnerability in Technological Cultures* Anique Hommels,Jessica Mesman,Wiebe E. acknowledges the fact that people are innately social beings who become human when they are part of a positive social environment This book wants to offer a greater insight into human nature and society Such an insight increases people's awareness and self confidence and reduces insecurity and fears of possible abuse As a result people will be better able to make the right decisions that benefit their life *The Spectator*, 1928 **Complete Works** Richard Sibbes, 1862
