The Mardudjara Aborigines Robert Tonkinson, 1978 General account of subsistence and material culture social organization life history religion cosmology and initiation ritual present day conditions with particular reference to Jigalong

Property and Equality Thomas Widlok, Wolde Gossa Tadesse, 2005 The ethnography of egalitarian social systems was first met with sheer disbelief Today it is still hotly debated in a number of fields and has gained sophistication as well as momentum This collection of essays on property and equality acknowledges this diversification by presenting research results in two complementary volumes They bring together a wide range of authoritative researchers most of whom have worked with hunter gatherer groups These two volumes cover existing ethnographic and theoretical ground while maintaining a clear focus on the relation between property and equality The book consists of the most recent work of prominent members of the original group of researchers in hunter gatherer studies among them James Woodburn and Richard Lee and very recent ethnography on hunter gatherers and other egalitarian systems

Pacific Answers to Western Hegemony Jürg Wassmann, 2020-09-02 The destruction of local identity through the relentless encroachment of a McDonald ized cultural imperialism is a global phenomenon Yet the reactions of Pacific peoples to this Western hegemony are diverse and encourage the creation of independent cultural identities through sports and games political mediations tourism media and filmmaking and the struggles for land rights and titles particularly in Australia This book based on extensive fieldwork addresses a subject of great immediacy to peoples of the Pacific Island nations It fills an important gap in existing ethnographic literature on the region and confidently navigates what had previously been considered uncharted even unchartable waters that wide sea between the classic ethnography of Oceania and contemporary anthropology s theoretical concerns with global relations and transnational cultures Its breadth rigour and timely contribution to post colonial politics in Oceania are certain to ensure that this book will provide an enduring contribution to the field

Information and Its Role in Hunter-Gatherer Bands Robert K. Hitchcock, William A. Lovis, Robert Whallon, 2011-12-31 Information and its Role in Hunter Gatherer Bands explores the question of how information broadly conceived is acquired stored circulated and utilized in small scale hunter gatherer societies or bands Given the nature of this question the volume brings together a group of scholars from multiple disciplines including archaeology ethnography linguistics and evolutionary ecology Each of these specialties deals with the question of information in different ways and with different sets of data given different primacy The fundamental goal of the volume is to bridge disciplines and subdisciplines open discussion and see if some common ground either theoretical perspectives general principles or methodologies can be developed upon which to build future research on the role of information in hunter gatherer bands

Re-writing Spatiality Britta Kuhlenbeck, 2010 The objective of this project is to encourage new ways of thinking about the meaning and significance of space It follows a desire that has been expressed and theorized by Henri Lefebvre and by extension Edward W Soja to remove Spatiality from

the margin of the Trialectics of Being and to bring it into the Trialectics fold alongside with and of at least equal significance to Historicity and Sociality The thesis focuses on how space of the Pilbara region in Western Australia is produced in contemporary Australian writing film art and through lived experience The thesis argues for an understanding of space as essentially dynamic

Religious Change and Indigenous Peoples Helena Onnudottir,Adam Possamai,2016-04-08

Exploring religious and spiritual changes which have been taking place among Indigenous populations in Australia and New Zealand this book focuses on important changes in religious affiliation in census data over the last 15 years Drawing on both local social and political debates while contextualising the discussion in wider global debates about changing religious identities especially the growth of Islam the authors present a critical analysis of the persistent images and discourses on Aboriginal religions and spirituality This book takes a comparative approach to other Indigenous and minority groups to explore contemporary changes in religious affiliation which have raised questions about resistance to modernity challenges to the nation state and or rejection of Christianity or Islam Helena Onnudottir Adam Possamai and Bryan Turner offer a critical analysis to on going public political and sociological debates about religious conversion especially to Islam and changing religious affiliations including an increase in the number of people who claim no religion among Indigenous populations This book also offers a major contribution to the growing debate about conversion to Islam among Australian Aborigines Maoris and Pacific peoples

The Human Swarm Mark W. Moffett,2019-04-16

The epic story and ultimate big history of how human society evolved from intimate chimp communities into the sprawling civilizations of a world dominating species If a chimpanzee ventures into the territory of a different group it will almost certainly be killed But a New Yorker can fly to Los Angeles or Borneo with very little fear Psychologists have done little to explain this for years they have held that our biology puts a hard upper limit about 150 people on the size of our social groups But human societies are in fact vastly larger How do we manage by and large to get along with each other In this paradigm shattering book biologist Mark W Moffett draws on findings in psychology sociology and anthropology to explain the social adaptations that bind societies He explores how the tension between identity and anonymity defines how societies develop function and fail Surpassing Guns Germs and Steel and Sapiens The Human Swarm reveals how mankind created sprawling civilizations of unrivaled complexity and what it will take to sustain them

Gardens of History and Imagination Gretchen Poiner,Sybil

Jack,2016-06-03 Whether on the ground or in the mind gardens carry meaning They reflect social and aesthetic values and may express hope anticipation or grief Throughout history they have provided a means of physical survival In creating and maintaining gardens people construe and construct a relationship with their environment But there is no single meaning carried in the word garden as idea and practice it reflects cultural differences in beliefs values and social organisation It embodies personal community even national ways of seeing and being in the world There are ten essays in Gardens of History and Imagination each of which examines the role of gardens and gardening in the settlement of New South Wales

and in growing a colony and a state They explore the significance of gardens for the health of the colony for its economy for the construction of social order and moral worth No less do they reveal the significance of forming and reforming personal identities in this process For the immigrants gardening was an act of settlement it was also a statement of possession for individuals and for Britain For a long time it was with memories of home often selective and idealised that settlers made gardens but as the colony developed its own character so did gardening possibilities and practices **Ritual, Media, and**

Conflict Ronald L. Grimes,Ute Husken,Udo Simon,Eric Venbrux,2011-03-23 An interdisciplinary team of twenty four scholars locates describes and explores cases in which media driven rituals or ritually saturated media instigate disseminate or escalate conflict The book s central question is When ritual and media interact either by the mediatizing of ritual or by the ritualizing of media how do the patterns of conflict change **War, Peace, and Human Nature** Douglas P. Fry,2015-02

The chapters in this book posit that humans clearly have the capacity to make war but since war is absent in some cultures it cannot be viewed as a human universal And counter to frequent presumption the actual archaeological record reveals the recent emergence of war It does not typify the ancestral type of human society the nomadic forager band and contrary to widespread assumptions there is little support for the idea that war is ancient or an evolved adaptation Views of human nature as inherently warlike stem not from the facts but from cultural views embedded in Western thinking Amazon com

Non-Religion among Australian Aboriginal Peoples James L. Cox, Adam Possamai, 2016-12-01 Offering a significant contribution to the emerging field of Non Religion Studies Religion and Non Religion among Australian Aboriginal Peoples draws on Australian 2011 Census statistics to ask whether the Indigenous Australian population like the wider Australian society is becoming increasingly secularised or whether there are other explanations for the surprisingly high percentage of Aboriginal people in Australia who state that they have no religion Contributors from a range of disciplines consider three central questions How do Aboriginal Australians understand or interpret what Westerners have called religion Do Aboriginal Australians distinguish being religious from being non religious How have modernity and Christianity affected Indigenous understandings of religion These questions refocus Western dominated concerns with the decline or revival of religion by incorporating how Indigenous Australians have responded to modernity how modernity has affected Indigenous peoples religious behaviours and perceptions and how variations of response can be found in rural and urban contexts Savage Grace Jay Griffiths, 2015-01-01 Jay Griffiths is a tour guide for anyone who has ever wished to commune with the side of our human psyche that remains in touch with the wild Equally at home among the sea gypsy Bajo people who live off the coast of Thailand and forage their food from the ocean floor drinking the psychedelic ayahuasca plant with Amazonian shamans or joining an Inuit whale hunt at the northern tip of Canada Griffiths takes readers on an adventure both charted and unchartable She divides her meditations on these travels into sections named after the ancient elemental properties of the universe Earth Air Fire Ice and Water because her subject matter is not merely the places traveled to but the depths of mind and the cultural narratives revealed by place It is a universal story told of far flung groups of humans with vastly different ways of life connected through the varied wilderness that sustains them By describing the ways in which human societies and the human mind have developed in response to the wilder elements of our homelands Savage Grace reveals itself as a benediction for the emotional intellectual and physical nourishment that people continue to draw from the natural world Under the sway of Griffiths charisma her poetic prose and her deeply learned and persuasive case for the wild roots of our shared human being we learn that we are all each and every one of us a force of nature *Crow-Omaha* Thomas R. Trautmann, Peter M. Whiteley, 2012-11-15 The Crow Omaha problem has perplexed anthropologists since it was first described by Lewis Henry Morgan in 1871 During his worldwide survey of kinship systems Morgan learned with astonishment that some Native American societies call some relatives of different generations by the same terms Why

Intergenerational skewing in what came to be named Crow and Omaha systems has provoked a wealth of anthropological arguments from Rivers to Radcliffe Brown from Lowie to Lévi Strauss and many more Crow Omaha systems it turns out are both uncommon and yet found distributed around the world For anthropologists cracking the Crow Omaha problem is critical to understanding how social systems transform from one type into another both historically in particular settings and evolutionarily in the broader sweep of human relations This volume examines the Crow Omaha problem from a variety of perspectives historical linguistic formalist structuralist culturalist evolutionary and phylogenetic It focuses on the regions where Crow Omaha systems occur Native North America Amazonia West Africa Northeast and East Africa aboriginal Australia northeast India and the Tibeto Burman area The international roster of authors includes leading experts in their fields The book offers a state of the art assessment of Crow Omaha kinship and carries forward the work of the landmark volume *Transformations of Kinship* published in 1998 Intended for students and scholars alike it is composed of brief accessible chapters that respect the complexity of the ideas while presenting them clearly The work serves as both a new benchmark in the explanation of kinship systems and an introduction to kinship studies for a new generation of students
