Containing highly instructive lists identifying the names of flowers as well as insects and other animals, the book also discusses the earliest depictions of flower still life and the distinctive characteristics behind the development of floral arrangements in different periods, including the variation of the flowers, the variety of techniques used by artists, as well as an exploration of the symbolism behind the numerous plant and animal species. This form of art portrays nature. Composed in Dutch, the text was translated into English by Judith Deitch and edited by Philip Kelleway. Publication of this book was made possible thanks to generous support of Dr med Bettina Leysen, Rose Marie and Eijk van Otterloo, and the Center for Netherlandish Art at the Museum of Fine Arts Boston. With additional support of the M A O C Gravin van Bylandt Stichting. See inside the book.

**Early Professional Women in Northern Europe, c. 1650-1850** Johanna Ilmakunnas, Marjatta Rahikainen, Kirsi Vainio-Korhonen, 2017-07-06

This book focuses on early examples of women who may be said to have anticipated in one way or another modern professional and/or career-oriented women. The contributors to the book discuss women who may at least in some respect be seen as professionally ambitious, unlike the great majority of working women in the past. In order to improve their positions or to find better business opportunities, the women discussed in this book invested in developing their qualifications and professional skills, took economic or other kinds of risks, or moved to other countries. Socially, they range from elite women to women of middle class and lower middle class origin. In terms of theory, the book brings fresh insights into issues that have been long discussed in the field of women's history and are also debated today. However, despite its focus on women, the book is conceptually not so much focused on gender as it is on profession, business, career, qualifications, skills, and work. By applying such concepts to analyzing women's endeavours, the book aims at challenging the conventional ideas about them.

It introduces the reader to women who received encouragement from their families and of those who had to fight for an education. It tells of the successes of women held in high regard by male colleagues and of those scorned. Their stories will embolden the next generation of female leaders in STEM and enlighten the males who will be there working alongside them.
