Marienthal The Sociography Of An Unemplo:

Marienthal Marie Jahoda, Paul F. Lazarsfeld, Hans Zeisel, 2017-07-12 One of the main theses of the Marienthal study was that prolonged unemployment leads to a state of apathy in which the victims do not utilize any longer even the few opportunities left to them The vicious cycle between reduced opportunities and reduced level of aspiration has remained the focus of all subsequent discussions So begin the opening remarks to the English language edition of what has become a major classic in the literature of social stratification On the Mysteries of Unemployment, 2013-04-09 Since the beginning of the economic crisis of the 1980s considerable research has been dedicated to the study of the unemployment problem Nevertheless the phenomenon has not become fully understood nor are its consequences adequately prevented In this important new volume On the Mysteries of Unemployment economists and social scientists come together to offer the reader the latest insights on unemployment and policies regarding unemployment from the perspectives of both disciplines On the Mysteries of Unemployment contains four main sections Part One provides an introductory chapter and general overview Part Two contains rich contributions that provide new insights from an economic science perspective while Part Three offers a balanced view from social scientists The final section is devoted to the examination of policy issues concerning unemployment This volume unique in its field will be of interest to researchers students politicians and policy makers

Underclass John Welshman, 2013-10-10 Who are those at the bottom of society There has been much discussion in recent years on both Left and Right about the existence of an alleged underclass in both Britain and the USA It has been claimed this group lives outside the mainstream of society is characterised by crime suffers from long term unemployment and single parenthood and is alienated from its core values John Welshman shows that there have always been concerns about an underclass whether constructed as the social residuum of the 1880s the problem family of the 1950s or the cycle of deprivation of the 1970s There are marked differences between these concepts but also striking continuities Indeed a concern with an underclass has in many ways existed as long as an interest in poverty itself This book is the first to look systematically at the question providing new insights into contemporary debates about behaviour poverty and welfare reform This new edition of the pioneering text has been updated throughout and includes brand new chapters on Problem Families and New Labour as well as Troubled Families and the Coalition Government It is a seminal work for anyone interested in the social history of Britain and the Welfare State *The Price of Prosperity* Richard Taylor, Peter Saunders, 2002 While our leaders celebrate Australia's economic miracle unemployment particularly long term unemployment has become a permanent feature of Australia's economic landscape Its unacceptably high level has proved remarkably resistant in the face of sustained economic growth and increased prosperity The adverse economic and social consequences of high unemployment are likely to leave long term scars on those affected as well as on local communities and the entire fabric of Australian society Yet these effects rarely feature on the policy agenda and the costs of unemployment remain largely invisible **The**

German Unemployed (Routledge Revivals) Richard J. Evans, Dick Geary, 2015-06-05 Unemployment was perhaps the major problem confronting European society at the time in which this book was first published in 1987 and is arguably still the case today This collection of essays by British and German historians contributes to the debate by taking a close look at unemployment in the Weimar Republic What groups were most severely affected and why How did they react How effective were welfare and job creation schemes Did unemployment fuel social instability and political extremism How far was unemployment a cause of the collapse of the Weimar Republic and the triumph of the Third Reich Did the Nazis solve the unemployment problem by peaceful Keynesianism or through massive rearmament This book is ideal for students of history sociology and economics

Brave New Workplace Julian Barling, 2023 Brave New Workplace argues that organizations should focus on creating environments in which employees can flourish rather than relying on the resiliency of workers to withstand difficult working conditions Author Julian Barling outlines 10 elements for a healthy and productive workplace leadership autonomy meaning belonging growth fairness clarity recognition safety and physical environment and illustrates how these elements can be readily implemented and how they can increase levels of work performance and employee well being

Prisoners of Want: The Experience and Protest of the Unemployed in France, 1921-45 Matt Perry, 2017-11-30 Prisoners of Want examines the experience of the unemployed and their protests in France in the interwar years Little has been written on the experience of unemployment in France despite the wealth of material social and medical investigations government reports novels memoirs and newspapers that can be used to reconstruct the representation and reality of the experience Assessing the impact of unemployed protest upon the authorities in terms of policy and the longer term development of the welfare state this book places the role of the unemployed in the wider context of European social movements in the 1930s as well as considering the significance of unemployed protests upon the French collective memory The part played by the French Communist Party in the creation and leadership of the movements of the unemployed and the range of activities these movements undertook is also explored From self help to protests hunger marches demonstrations relief work school strikes town hall occupations and riots all were strategies that the unemployed utilised to draw attention to their plight Crucial to explaining the characteristics of these movements is an understanding of the dynamics of protest and how different tactics were selected during their development particularly the extent to which tactical shifts were related to the nature of the response of the authorities By exploring these under researched facets of political life a much fuller understanding of French society during the turbulent interwar years is offered

Education, Training and the Future of Work I John Ahier, Geoff Esland, 2013-10-18 A central claim of this volume is that public policy in education and training can only be properly understood if it is seen in relation to prevailing economic and employment conditions It has become increasingly apparent that the neo liberal economic policies pursued by Western governments during the 1980s and 1990s have led to a growing world wide work crisis Unemployment levels particularly in Europe remain persistently high and for

those in employment job insecurity and long working hours have become the norm The response of UK governments has been to promote flexibility in employment practices while proclaiming the importance of improving skill levels through education and training This volume challenges the adequacy of such an approach and asks whether reliance on education and training reforms without additional political intervention in economic processes is capable of reversing current trends Issues covered in this reader include the impact of globalization on employment trends neo liberal and neo Keynesian approaches to employment policy political reforms in education and training institutions the impact of flexibilization on private life and the family The two volumes in this series are readers for the Open University course Education Training and the Future of Work E837 a module of the MA in Education The companion volume is Education Training and the Future of Work II Developments in Vocational Education and Training John Ahier is Lecturer in Education at the Open University Geoff Esland is Director of the Centre for Sociology and Social Research at the Open University and Course team Chair of E837

Reinventing Work in Europe Dominique Méda, Patricia Vendramin, 2016-12-19 This book looks at the history of work and the meanings that are attached to it over time Taking as its basis a number of international surveys and interviews conducted in Europe the authors consider the significance of work for Europeans today Over the years the meaning of work has changed It has become more highly diversified and it is today invested with high expectations that conflict with organisational developments and the changing nature of the labour market The authors use a generational perspective to explore whether it is possible to reconcile the contemporary ethos of work especially with regards to women and young people with organisations that are increasingly under pressure to be profitable and productive *Reinventing Work in Europe* will be of interest to scholars and students in the areas of sociology of work employment and organizations labour studies digital economy and political economy
