**Mariko Mori** Public Art Fund (N.Y.),2004      Wave UFO - Mariko Mori : 08.02.-23.03.2003 Mariko Mori,2003      **A Capsule Aesthetic** Kate Mondloch,2018-01-23 How new media art informed by feminism yields important and original insights about interacting with technologies In A Capsule Aesthetic Kate Mondloch examines how new media installation art intervenes in the fields of technoscience and new materialism showing how three diverse artists Pipilotti Rist Patricia Piccinini and Mariko Mori contribute to the urgent conversation about everyday technology and the ways it constructs our bodies A Capsule Aesthetic establishes the unique insights that feminist theory offers to new media art and new materialisms offering a fuller picture of human nonhuman relations In depth readings of works by Rist Piccinini and Mori explore such questions as the role of the contemporary art museum in our experience of media art how the human is conceived of by biotechnologies and how installation art can complicate and enrich contemporary science's understanding of the brain With vivid firsthand descriptions of the artworks Mondloch takes the reader inside immersive installation pieces showing how they allow us to inhabit challenging theoretical concepts and nonanthropomorphic perspectives Striving to think beyond the anthropocentric and fully consider the material world A Capsule Aesthetic brings new approaches to questions surrounding our technology saturated culture and its proliferation of human to nonhuman interfaces      **Perception and Agency in Shared Spaces of Contemporary Art** Cristina Albu,Dawna Schuld,2017-12-15 This book examines the interconnections between art phenomenology and cognitive studies Contributors question the binary oppositions generally drawn between visuality and agency sensing and thinking phenomenal art and politics phenomenology and structuralism and subjective involvement and social belonging Instead they foreground the many ways that artists ask us to consider how we sense think and act in relation to a work of art      Experimental Formats Roger Fawcett-Tang,2005 The book examines every aspect of designing the printed form from single page to commercial package      *Brain Art* Anton Nijholt,2019-05-25 This is the first book on brain computer interfaces BCI that aims to explain how these BCI interfaces can be used for artistic goals Devices that measure changes in brain activity in various regions of our brain are available and they make it possible to investigate how brain activity is related to experiencing and creating art Brain activity can also be monitored in order to find out about the affective state of a performer or bystander and use this knowledge to create or adapt an interactive multi sensorial audio visual tactile piece of art Making use of the measured affective state is just one of the possible ways to use BCI for artistic expression We can also stimulate brain activity It can be evoked externally by exposing our brain to external events whether they are visual auditory or tactile Knowing about the stimuli and the effect on the brain makes it possible to translate such external stimuli to decisions and commands that help to design implement or adapt an artistic performance or interactive

installation Stimulating brain activity can also be done internally Brain activity can be voluntarily manipulated and changes can be translated into computer commands to realize an artistic vision The chapters in this book have been written by researchers in human computer interaction brain computer interaction neuroscience psychology and social sciences often in cooperation with artists using BCI in their work It is the perfect book for those seeking to learn about brain computer interfaces used for artistic applications

**Critical Concepts for the Creative Humanities** Iris van der Tuin, Nanna Verhoeff, 2022-02-15 This concise precise and inclusive dictionary contributes to a growing transforming and living research culture within both humanities scholarship and professional practices within the creative sectors Its format of succinct starting definitions demonstrations of possible routes of further development and references to new and revisited concepts as conceptual invitations allows readers to quickly uptake and orient themselves within this exciting methodological field for didactic scholarly and creative use and as a starting point for further investigation for future contributions to the new canon of critical concepts Critical Concepts for the Creative Humanities is the first book to outline and define the specific and evolving field of the creative humanities and provides the field's nascent bibliography

**New Interior Design** Nigel Coates, 2004-12-14 The book is designed to give a stimulating idea of the current direction of international interior design by Nigel Coates one of the foremost practitioners in the field The author has selected approximately 30 international designers whose work he thinks is especially interesting The book will then present a selection of work by these designers in such a way that the relations between different designers both the differences and similarities are brought out as well as broader themes in current interior design While each project selected will be featured over a series of pages the same project may crop up at various other points through book The purpose of this is to draw comparisons between each project by letting them cross over into one another's territory Hence Collidoscope the provisional title of the publication As such it should work both as a sourcebook with reference to current tendencies in design and to the ideas that underpin them It will foreground the designers yet raise challenging differences and overlaps between them

**The Global Work of Art** Caroline A. Jones, 2017-06-01 Global biennials have proliferated in the contemporary art world but artists' engagement with large scale international exhibitions has a much longer history that has influenced the present in important ways Going back to the earliest world's fairs in the nineteenth century this book argues that globalism was incubated in a century of international art contests and today constitutes an important tactic for artists As world's fairs brought millions of attendees into contact with foreign cultures products and processes artworks became juxtaposed in a theater of nations which challenged artists and critics to think outside their local academies From Gustave Courbet's rebel pavilion near the official art exhibit at the 1855 French World's Fair to curator Beryl Madra's choice of London based Cypriot Hussein Chalayan for the off site Turkish pavilion at the 2006 Venice Biennale artists have used these exhibitions to reflect on contemporary art speak to their own governments back home and challenge the wider geopolitical

realm changing art and art history along the way Ultimately Caroline A Jones argues the modern appetite for experience and event structures which were cultivated around the art at these earlier expositions have now come to constitute contemporary art itself producing encounters that transform the public and force us to reflect critically on the global condition Art Since 1989 (World of Art) Kelly Grovier,2015-12-07 An extensive accessible guide to the most groundbreaking and influential art from 1989 to the present The years since the collapse of the Berlin Wall in November 1989 have seen the rise of a new freedom to define art Who makes it Where can it be found What is its commercial value and consequently the reevaluation of art s place in society Kelly Grovier surveys the dynamic developments in art practice worldwide since 1989 focusing on artists whose fresh visual vocabulary and innovation reflect these past turbulent decades The book s ten chapters examine the key themes in contemporary art portraiture in the age of face transplants and facial recognition software political activism science and religion to name a few by artists including Jeff Koons Louise Bourgeois Damien Hirst George Condo Marlene Dumas Sean Scully Cindy Sherman Banksy Ai Weiwei Antony Gormley Christo and Jean Claude Jenny Holzer Chuck Close and Cornelia Parker A chapter length timeline at the end of the book traces the evolution of art from 1989 to today by closely examining one key artwork from each year Illustrated with the work of over 200 key artists Art Since 1989 is a lucid and engaging look at what may prove to be one of the more tempestuous eras in human history if not the history of art

**Contemporary Art** Alexander Dumbadze,Suzanne Hudson,2012-12-04 An engaging account of today s contemporary art world that features original articles by leading international art historians critics curators and artists introducing varied perspectives on the most important debates and discussions happening around the world Features a collection of all new essays organized around fourteen specific themes chosen to reflect the latest debates in contemporary art since 1989 Each topic is prefaced by an introduction on current discussions in the field and investigated by three essays each shedding light on the subject in new and contrasting ways Topics include globalization formalism technology participation agency biennials activism fundamentalism judgment markets art schools and scholarship International in scope bringing together over forty of the most important voices in the field including Sof a Hern ndez Chong Cuy David Joselit Michelle Kuo Raqs Media Collective and Jan Verwoert A stimulating guide that will encourage polemical interventions and foster critical dialogue among both students and art aficionados **Nervous Systems** Johanna Gosse,Timothy Stott,2021-11-02 The contributors to Nervous Systems reassess contemporary artists and critics engagement with social political biological and other systems as a set of complex and relational parts an approach commonly known as systems thinking Demonstrating the continuing relevance of systems aesthetics within contemporary art the contributors highlight the ways that artists adopt systems thinking to address political social and ecological anxieties They cover a wide range of artists and topics from the performances of the Argentinian collective the Rosario Group and the grid drawings of Charles Gaines to the video art of Singaporean artist Charles Lim and the mapping of global logistics infrastructures by contemporary artists like Hito Steyerl and Christoph B

chel Together the essays offer an expanded understanding of systems aesthetics in ways that affirm its importance beyond technological applications detached from cultural contexts Contributors Cristina Albu Amanda Boetzkes Brianne Cohen Kris Cohen Jaimey Hamilton Faris Christine Filippone Johanna Gosse Francis Halsall Judith Rodenbeck Dawna Schuld Luke Skrebowski Timothy Stott John Tyson *Creative Measures of the Anthropocene* Kaya Barry, Jondi Keane, 2019-10-30 This book proposes that creative and participatory modes of measuring knowing and moving in the world are needed for coming to grips with the Anthropocene epoch It interrogates how creative affective and experiential encounters that traverse the local and the global as well as the mundane and the everyday can offer new perspectives on the challenges that lay ahead This book considers the role of the arts in exploring geographical concerns and increasing human mobility In doing so it offers ways to counteract the unstable shifting and disorienting impacts and debates surrounding human activity and the Anthropocene The authors bring together perspectives from mobilities creative arts cultural geography philosophy and humanities in an innovative exploration of how creative forms of measurement can assist in reconfiguring individual and collective action Tactics of Interfacing Ksenia Fedorova, 2020-08-11 How digital technologies affect the way we conceive of the self and its relation to the world considered through the lens of media art practices In *Tactics of Interfacing* Ksenia Fedorova explores how digital technologies affect the way we conceive of the self and its relation to the world With the advent of ubiquitous computing the self becomes an object of technological application increasingly defined by data received from tracking technologies Subtly these technologies encourage versions of ourselves that are easier to interpret computationally Fedorova views these shifts in self perception through the lens of contemporary media art practices examining a range of artistic tactics that enable embodied and intimate experiences of machinic operations on our lives At the center of Fedorova's analysis are the mechanisms that structure the relations between the self and the world at the level of the interface she considers interfacing a process in which interrelation happens and different agencies play off against each other She discusses such topics as interfaciality and the face as a medium self image and the boundaries of the self understood through technological mediation of an embodied experience the relation between the self and the other reshaped by algorithmic technologies and the augmentation and alteration of spatial perception The artworks Fedorova discusses present scenarios of interfacing that range from responsive environments to artificial intelligence conversational agents She shows that art and aesthetic experience offer fruitful ways to reflect on the effects of contemporary technological culture enabling encounters that shift our perspectives on the boundaries of the self and challenge the very capacity to feel human
