Constructing China's Capitalism D. Buck,2012-08-06 By investigating the nexus of relationships between urban and rural factories in the Shanghai region of China this book shines light on an overlooked part of China s massive industrial growth since the 1980s

Reform and the Non-State Economy in China H. Lai,2006-11-27 Built on rich data analyses this book offers a fresh and in depth explanation of how China s pro reform leaders successfully launched controversial policies to promote private and foreign economic sectors managed leadership conflict and ensured reform in the provinces and rapid growth in the nation

Two

Decades of Reform Shahid Yusuf, Kaoru Nabeshima, 2006 Since the early 1980s China has begun gradually integrating with the global system. In doing so the country has moved toward its own unique brand of market socialism which recognizes private ownership and is adopting market institutions and pursuing industrial change within the framework of an urban economic environment. The process of transition has now permeated every corner of Chinese life and no organization has been left untouched. Yet industrial organization in China especially in the state sector has been slow to shed many of the distinctive structural characteristics of the old line Maoist era state enterprises. The main prong of the industrial strategy in support of urban change is ownership reform that transforms state owned enterprises into corporate entities with majority state ownership or places them wholly in private hands in the process also bolstering the incentives for and the dynamism of the private sector. While the central government spearheads the ownership reform initiative in the majority of cases the actual implementation is in the hands of municipal county and prefectural governments that must coordinate their efforts with other factors influencing urban changes. This paper situates industrial change in China within the context of urban development and examines the interplay of broad reform strategy with local implementation and its actual practice by the reformed firms.

Diplomacy and Developing Nations Maurice A. East, Justin Robertson, 2012-09-10 This volume explores the foreign policy environment facing developing nations and their particular foreign policy making structures and processes. By defining foreign policy broadly to incorporate the activities of a range of state actors and non state actors the book broadens the range of analytical frameworks for studying foreign policy making in developing nations. Thus the actions of small groups of elites international institutions and transnational networks are seen to be part of foreign policy making as well as the traditional operations of foreign ministries. The volume is comprised of an extensive introduction four thematic chapters six country studies and a conclusion that ties together common themes. These serve as a useful contribution to the analysis of foreign policy making in developing nations a neglected area in the comparative study of foreign policy.

The SARS Epidemic John Wong, Yongnian Zheng, 2004 In the first half of 2003 severe acute respiratory syndrome SARS struck China including Hong Kong causing panic and claiming many lives. The unknown nature of SARS at that time also jolted the economic growth of China and Hong Kong disrupted the social life of their citizens and created much stress and strain for their political systems and governance. Like other major crises the management of the SARS crisis provides a good opportunity to examine the strengths and weaknesses of the political systems in China and Hong Kong. From the outset scholars at the East Asian Institute EAI followed closely the unfolding of the disease in China particularly how each of the two societies coped with this random external shock. SARS may or may not recur in the near future but the episode has offered a glimpse into the extent of resilience of the two societies the quality of their political leadership the effectiveness of their political and institutional mobilization the crisis management capability of their respective bureaucracies and the viability of their governance systems. This volume is the result of an EAI workshop on SARS in China.

Crises and Responses Reform,

Legitimacy And Dilemmas: China's Politics And Society Gungwu Wang, Yongnian Zheng, 2001-02-06 How has China's post Deng leadership governed the country How have the changing social and political environments shifted the bases of political legitimacy What strategies has Jiang Zemin adopted to cope with new circumstances in order to strengthen his leadership What are the challenges these new reform measures have generated for the leadership And how have domestic concerns constrained the leadership's intention in China's foreign relations These are some of the questions which this volume attempts to address The authors agree that Jiang Zemin is not a man without any political initiative He has struggled to establish his own style of leadership and to strengthen the legitimacy of his leadership by setting forth new rules and institutions for political games and by finding new measures to cope with new challenges This collection of articles shows the success Jiang and his colleagues have had in strengthening their leadership how the different reform measures have strengthened Jiang's rule and how the ongoing reform has created new challenges for his regime *The Changing Face of Chinese Management* Tang Jie, Anthony Ward, 2004-03-10 Chinese management has experienced a dramatic change in recent years In many areas established ideas about how Chinese management operates are oversimplified and outdated This book sets out to provide a more realistic portrait of Chinese management today and how it has changed dramatically over the past ten years The portrait of contemporary Chinese management draws on extensive interviews with Chinese managers conducted by the authors These provide a wealth of concrete illustrations of how managers deal on a daily basis with the opportunities and threats they face *Under New Ownership* Shahid Yusuf, Kaoru Nabeshima, Dwight Heald Perkins, 2006 Although China's centrally planned economy is a little more than a shadow of its former self the closely inter linked reforms of the enterprise and banking sectors are still incomplete The relative size of the state owned enterprise sector has been much reduced however the sector remains the dominant borrower from the banking system and is responsible for the majority of bank non performing assets Thus in the interests of financial stability it is crucial to implement the remaining reform agenda The accession to the WTO has also made it more urgent for China's most dynamic state owned en **From Mao to Market** Andrew H. Wedeman, 2003-07-10 Andrew Wedeman argues that China succeeded in moving from a Maoist command economy to a market economy because the central government failed to prevent local governments from forcing prices to market levels Having partially decontrolled the economy in the early 1980s economic reformers balked at price reform opting instead for a hybrid system wherein commodities had two prices one fixed and one floating Depressed fixed prices led to resource wars as localities battled each other for control over undervalued commodities while inflated consumer goods prices fuelled a headlong investment boom that saturated markets and led to the erection of import barriers Although local rent seeking and protectionism appeared to carve up the economy in reality they had not only pushed prices to market levels and cleared the way for sweeping reforms in the 1980s they had also pushed China past the pitfalls of reform that entrapped other socialist economies *Chinese Politics Illustrated: The Cultural, Social, And Historical Context* Lance

Entrepreneurship in China Keming Yang,2016-04-29 The emergence of China as a major world economy is of great importance to the global political economy and to international business There has been much research on the macro level of institutional reform but little detailed work on the grassroots level of entrepreneurship in China This innovative book addresses this gap by investigating how an economic system dominated by central plans communist ideologies and suppressing bureaucracies could generate such energy from the bottom of society fuelling the country s economic growth Keming Yang s theory of entrepreneurship is based on two interrelated concepts double entrepreneurship and institutional holes He argues that the two concepts bridge a gap between the neo classical institutionalism of economic development and entrepreneurship studies that emphasize individual choice The rigorous theoretical framework is supported by substantial empirical research offering statistical analyses of survey data as well as detailed case studies This timely book will appeal to an interdisciplinary readership in sociology economics business studies and Chinese and Asian Studies *Prosperity,*

Region, and Institutions in Maritime China Billy K.L. So,2020-03-23 Prosperity signifies success in economic performance Economic performance always takes place in a spatial context And institutions matter in economic performance These three interwoven themes underlie this inquiry into the regional economy of southern Fukien province during the Sung and Yuan dynasties when the area was one of the most prosperous regions in China Through a meticulous reading of the sources the author seeks to understand the meaning of prosperity in the premodern Chinese context and argues that we have to understand economic performance as a process occurring in space and influenced by institutions which affect economic actors particularly through the means of transaction costs **De Facto Federalism in China** Yongnian Zheng,2007 This

book is the first attempt to conceptualize ChinaOCOs central local relations from the behavioral perspective Although China

does not have a federalist system of government the author believes that with deepening reform and openness China's central local relations is increasingly functioning on federalist principles Federalism as a functioning system in China is under studied The author defines the political system existing in China as OC de facto federalismOCO and provides a detailed analysis of its sources and dynamics in the book The system is mainly driven by two related factors OCO inter governmental decentralization and globalization While economic decentralization since the 1980s has led to the formation of de facto federalism globalization since the 1990s has accelerated this process and generated increasingly high pressure on the Chinese leadership to institutionalize de facto federalism by various measures of selective recentralization Challenges to State Policy Capacity M.
