Towards a Socioanalysis of Money, Finance and Capitalism Susan Long, Burkard Sievers, 2013-06-17 The current global financial crisis has raised awareness of the impact the world of finance has on the economy and the future of democracy Following the crisis this book aims at a deep understanding of the human psycho social dynamics beneath the surface of the financial industry its markets and institutions It seeks to understand why the seemingly rational world of economic behavior with its calculated models and predictions at times goes horribly wrong This book uses the discipline of socio analysis to explore the meaning of money markets and the broad financial world that so strongly affects our daily lives Socio analysis contributes to an awareness and understanding of underlying unconscious desires fantasies and illusions that bring about the irrational inflation of faith and trust in the world of money finance and capital ism The insight that the financial crisis was essentially psychological in origin Robert Shiller and that the world of finance is broadly shaped if not determined by irrational often unconscious factors is not yet broadly shared This book appears to be one of the first if not the first contribution that explicitly focuses on what is beneath the surface of money finance and capital It invites the reader to explore the financial world in depth The aim of this book is to provide businesses organizational consultants students researchers and interested persons more broadly with a detailed exploration of the psycho social dynamics of the financial industry as it exists currently within the capitalist system The contributors to this book come from Australia Denmark France Germany Hungary Sweden The Netherlands UK and USA **Orderly Fashion** Patrik Aspers, 2016-06-28 For any market to work properly certain key elements are necessary competition pricing rules clearly defined offers and easy access to information Without these components there would be chaos Orderly Fashion examines how order is maintained in the different interconnected consumer producer and credit markets of the global fashion industry From retailers in Sweden and the United Kingdom to producers in India and Turkey Patrik Aspers focuses on branded garment retailers chains such as Gap

H M Old Navy Topshop and Zara Aspers investigates these retailers interactions and competition in the consumer market for fashion garments traces connections between producer and consumer markets and demonstrates why market order is best understood through an analysis of its different forms of social construction Emphasizing consumption rather than production Aspers considers the larger retailers roles as buyers in the production market of garments and as potential objects of investment in financial markets He shows how markets overlap and intertwine and he defines two types of markets status markets and standard markets In status markets market order is related to the identities of the participating actors more than the quality of the goods whereas in standard markets the opposite holds true Looking at how identities products and values create the ordered economic markets of the global fashion business Orderly Fashion has wide implications for all modern markets regardless of industry

Carrier, Peter Luetchford, 2012 Increasingly consumers in North America and Europe see their purchasing as a way to express to the commercial world their concerns about trade justice the environment and similar issues This ethical consumption has attracted growing attention in the press and among academics Extending beyond the growing body of scholarly work on the topic in several ways this volume focuses primarily on consumers rather than producers and commodity chains It presents cases from a variety of European countries and is concerned with a wide range of objects and types of ethical consumption not simply the usual tropical foodstuffs trade justice and the system of fair trade Contributors situate ethical consumption within different contexts from common Western assumptions about economy and society to the operation of ethical consumption commerce to the ways that people's ethical consumption can affect and be affected by their social situation By locating consumers and their practices in the social and economic contexts in which they exist and that their ethical consumption affects this volume presents a compelling interrogation of the rhetoric and assumptions of ethical
