***Handbook on Higher Education Management and Governance*** Alberto Amaral, António Magalhães, 2023-10-06 This ground breaking Handbook examines the evolution of university autonomy and governance by tracking the changing relationship between higher education institutions and the state Through unique historical analyses contributors provide important insights into the position of students academics and universities in today's society and map potential future directions of travel for the sector

*Rethinking the "L" Word in Higher Education: The Revolution of Research on Leadership* Adrianna Kezar, Rozana Carducci, Melissa Contreras-McGavin, 2011-10-19 In these times of change and challenge in higher education pleas for leadership have become frequent However the type of leadership required within this new context of globalization demographic changes technological advancement and questioning of social authority may call for different skills requiring a re education among campus stakeholders if they want to be successful leaders In the past twenty years there has been a revolution in the way that leadership is conceptualized across most fields and disciplines Leadership has moved away from being leader centered individualistic hierarchical focused on universal characteristics and emphasizing power over followers Instead a new vision has emerged leadership that is process centered collective context bound non hierarchical and focused on mutual power and influence processes This volume summarizes research and literature about new conceptualizations of leadership to inform practice This is volume 31 number 6 of the ASHE Higher Education Report a bi monthly journal published by Jossey Bass See our entire list of ASHE Higher Education

Report titles for a wide variety of critical issues facing Higher Education today      *Higher Education in Asia/Pacific* Terance W. Bigalke, Deane E. Neubauer, 2009-09-14 Expansion and privatization have created new concerns over the quality of education throughout the Asia Pacific region This volume provides a framework to examine these challenges in the region and beyond      Handbook of Research on Innovative Technology Integration in Higher Education Nafukho, Fredrick Muya, Irby, Beverly J., 2015-02-28 Our increasingly globalized world is driven by shared knowledge and nowhere is that knowledge more important than in education Now more than ever there is a demand for technology that will assist in the spread of knowledge through customized self paced and on demand learning The Handbook of Research on Innovative Technology Integration in Higher Education provides an international perspective on the need for information and communication technology in education and training Highlighting the use of technology in both formal and informal learning this book is an essential reference for academics corporate leaders government agencies profit and non profit organizations policymakers or anyone interested in the use of technology to educate and share information      Globalization and Higher Education Jaishree K. Odin, Peter T. Manicas, 2004-01-31 Post secondary education is a massive globalizing industry with a potential for growth that cannot be overestimated By 2010 there will be 100 million people in the world all fully qualified to proceed from secondary to tertiary education but there will be no room left on any campus A distinguished panel of scholars and educational administrators from the Americas Asia Europe and the Pacific was asked to speak on the complexities of globalized higher education from their positions of concern and expertise and then engage in a dialogue The result is this timely and important work Globalization and Higher Education aims to energize readers into rethinking higher education It succeeds by dealing thoughtfully and provocatively with pertinent issues that cut across and transcend national boundaries as well as very different points of view Contributors Tom P Abeles Jan Currie Gerard Delanty Leonardo Garnier Sohail Inayatullah Charles Karelis Peter T Manicas John J McDermott Michael Margoils Deane Neubauer Jaishree K Odin Richard S Ruch Charles Smith Su Hao Scott Thomas Peter Wagner      **Edgework** Stephen Lyng, 2005 First Published in 2005 Routledge is an imprint of Taylor Francis an informa company      *The Higher Education Managerial Revolution?* Alberto Amaral, V.L. Meek, Waelgaard Lars, 2012-12-06 Hedda founded on 1 January 2001 is a consortium of nine European centres and institutes devoted to research on higher education see web site [www.uv.uio.no/hedda](http://www.uv.uio.no/hedda) The consortium's aims are to strengthen the relationship between higher education research and practice organise and support available academic expertise and further knowledge on higher education in Europe in such a way that it becomes more accessible and visible at the supranational and international levels To contribute to the consortium's objectives CIPES one of its member institutes and Hedda have taken a new initiative in the field of research on higher education that is an annual seminar focused on one specific topic of research The topic is determined by the Hedda Board from among the most burning issues of present day higher education policies The first seminar was a four day scientific event on Governance Structures in Higher Education

**The Politics of Inquiry** Benjamin Baez, Deron Boyles, 2009-01-09 Winner of the 2010 Critics Choice Award presented by the American Educational Studies Association 2009 CHOICE Outstanding Academic Title In *The Politics of Inquiry* Benjamin Baez and Deron Boyles critique recent trends in education research to argue against the culture of science Using the National Research Council's 2002 report *Scientific Research in Education* as a point of departure they contend that the entire discourse on education science reflects a number of distinct but mutually constitutive political forces or movements that use science and education to shape what we can think and thus what we can become These forces include the attempts to restrict democracy via scientism the uses of academic classifications for organizing the world into social groups the imperatives of the informational society which seek precision in order to convert the world into data for easy governing and the effects of transnational capitalist exchanges which convert everything into a cost benefit analysis and which make us all complicit in ways we do not fully grasp Baez and Boyles examine these forces and offer an alternative to the current pushes to make educational inquiry scientific

*Reconstructing the "Uni-versity"* Harvey J. Graff, 2025-09-14 Slogans myths and isolated anecdotes are inadequate substitutes for documented history and contextual understanding Literature on the history of higher education is dominated by ahistorical and contextually ignorant slogans Seldom acknowledged in discussions of the decline or failure of the modern university is 1 how long it has been going on at least since the 1960s and 2 universities own complicity in this long complicated and contradictory process Myths intertwine inseparably with slogans to echo yet another lost cause Our collective as well as individual pasts provide essential lessons if we know how to read and learn from them More complicated is imagining a plausible better future for universities In *Reconstructing the Uni-versity From the Ashes of the Mega and Multi-versity to the Futures of Higher Education* Harvey J Graff bringing experience from over 50 years as a professor provides an accurate history of higher education redefining the issues and terms to establish a new agenda

Mitigating Inequality Robert T. Teranishi, Walter R. Allen, Loni Bordoloi Pazich, Marcelo Knobel, 2015-12-04 As colleges and universities extend academic programs abroad develop internationally mixed research teams and create international curricular initiatives it is essential to ensure that access to a high quality education remains a key component of the research and policy agenda transnationally

*Habits of Mind* William Allen, 2017-09-20 *Habits of Mind* maintains that the fact that almost everyone now goes to college need not be seen as an obstacle to excellence in education Some critics have insisted that college is not for everyone but William B Allen and Carol Allen assert that the college diploma has rightly become as much the norm in this century as the high school diploma was

during the twentieth century Accordingly it is essential that higher education remains true to its deepest purpose the cultivation of proficient humanity The authors see the key to this goal as the development of judgment or habits of mind Habits of mind are far and away the most influential determinants of human conduct and nowhere are they more profoundly shaped than in institutions of higher education Furthermore liberal education has proven most effective in this undertaking The authors elaborate on the purpose of higher education and identify the chief obstacles to achieving its aim They demonstrate the critical role of academic leaders in achieving the aim of higher education and posit that excellence in judgment is the primary characteristic of the academic leaders who fulfill this role They examine three aspects of access to higher education academic readiness the cost and funding of higher education and the capacity of the physical plant Finally they use policies developed in Virginia to demonstrate realistic approaches to achieving the aims of access and quality discussed throughout the book The authors draw on their years of experience as practitioners in both private and public institutions liberal arts colleges and research universities to develop their material This volume will be of interest to faculty and students in higher education programs nation and state public policymakers legislative and academic leaders and a general public concerned about the cost and value of a college education *Readings in Economic Sociology* Nicole Woolsey Biggart, 2008-04-15 These articles over thirty in total reflect the best and latest thought in the exciting field of economic sociology Beginning with the foundation of Smith Marx Engels and Polanyi the volume gathers some of the best writings by economic sociologists that consider national and world economies as both products and influences of society Contains over twenty articles by classical and contemporary economic social theorists Covers important topics on economic action states and markets Includes insightful editorial introductions and further reading suggestions **Resources in Education**, 2001-04 The Surveillance-Industrial Complex Kirstie Ball, Laureen Snider, 2013-07-04 Today's surveillance society emerged from a complex of military and corporate priorities that were nourished through the active and cold wars that marked the twentieth century Two massive configurations of power state and corporate have become the dominant players Mass targeted surveillance deep within corporate governmental and social structures is now both normal and legitimate The Surveillance Industrial Complex examines the intersections of capital and the neo liberal state in promoting the emergence and growth of the surveillance society The chapters in this volume written by internationally known surveillance scholars from a number of disciplines trace the connections between the massive multinational conglomerates that manufacture distribute and promote technologies of surveillance and the institutions of social control and civil society In three parts this collection investigates how the surveillance industrial complex spans international boundaries through the workings of global capital and its interaction with agencies of the state surveillance as an organizational control process perpetuating the interests and voices of certain actors and weakening or silencing others how local political economies shape the deployment and distribution of the massive interactions of global capital military that comprise surveillance systems today This volume

will be useful for students and scholars of sociology management business criminology geography and international studies

*Multi-Level Governance in Universities* Jetta Frost, Fabian Hattke, Markus Reihlen, 2016-06-03 Governing universities is a multi level as well as a highly paradoxical endeavor The featured studies in this book examine critically the multifaceted repercussions of changing governance logics and show how contradictory demands for scholarly peer control market responsiveness public policy control and democratization create governance paradoxes While a large body of academic literature has been focusing on the external governance of universities this book shifts the focus on organizations internal characteristics thus contributing to a deeper understanding of the changing governance in universities The book follows exigent calls for getting back to the heart of organization theory when studying organizational change and turns attention to strategies structures and control mechanisms as distinctive but interrelated elements of organizational designs We take a multi level approach to explore how universities develop strategies in order to cope with changes in their institutional environment macro level how universities implement these strategies in their structures and processes meso level and how universities design mechanisms to control the behavior of their members micro level As universities are highly complex knowledge based organizations their modus operandi i e governing strategies structures and controls needs to be responsive to the multiplicity of demands coming from both inside and outside the organization **When For-Profit Meets Nonprofit**

Jared Bleak, 2017-09-25 This study addresses the increasing tumult over the commercialization of higher education a battle over profit and principle money and mission While many issues in higher education encompass the mission and values of the university the operation of for profit subsidiaries by nonprofit universities provides the potential for an especially contentious clash Some faculty have been especially vocal in this debate claiming that the culture of the academy is being irreparably altered as traditional values are being replaced by a corporate style of management or by some hybrid By answering the questions of why for profit subsidiaries of nonprofit universities were created how they are governed and managed and what the nature of the relationship with their nonprofit parent is this book contributes to a better understanding of the larger controversy over whether universities have become too business like too market oriented and whether they have sold their souls and values in the process In essence the book provides a window into whether it is possible to do business like a business a trend afoot in the academy and still retain allegiance to core values

The Battles of Texas Nate Kreuter, Mark Garrett Longaker, 2025-01-07 The 1980s were a consequential decade for universities The marketization of higher education the adjunctification of labor and culture wars over curriculum transformed the landscape in a short period of time The Battles of Texas traces the lived consequences of this upheaval by focusing on one influential institution the writing program at the University of Texas at Austin Drawing from university records newspaper archives and present day interviews Nate Kreuter and Mark Garrett Longaker provide an on the ground perspective of the radical creation of UT Austin s writing program and the subsequent events that made national headlines the mass firing of lecturers in 1985 the national debate

over multicultural content in the first year curriculum and the divorce of the writing program from the English Department in 1992. Despite these pressures, however, the authors also reveal how writing program administrators at UT Austin exerted their own agency to resist economic and political forces in service of their students and adjunct lecturers. By highlighting the parallels between the 1980s and current labor and political pressures in higher education, *The Battles of Texas* offers a strategic perspective for academics and administrators today. Combining a narrative institutional history with a public digital archive, searchable and arranged in exhibits and in chronological annals, *The Battles of Texas* provides academics with the resources they need to survive in times of rapid transition.
