Market Based Reforms In Urban Education An Analysis:

Learning from the Federal Market-Based Reforms William J. Mathis, Tina M. Trujillo, 2016-06-01 Over the past twenty years educational policy has been characterized by top down market focused policies combined with a push toward privatization and school choice The new Every Student Succeeds Act continues along this path though with decision making authority now shifted toward the states These market based reforms have often been touted as the most promising response to the challenges of poverty and educational disenfranchisement But has this approach been successful Has learning improved Have historically low scoring schools turned around or have the reforms had little effect Have these narrow conceptions of schooling harmed the civic and social purposes of education in a democracy This book presents the evidence Drawing on the work of the nation s most prominent researchers the book explores the major elements of these reforms as well as the social political and educational contexts in which they take place It examines the evidence supporting the most common school improvement strategies school choice reconstitutions or massive personnel changes and school closures From there it presents the research findings cutting across these strategies by addressing the evidence on test score trends teacher evaluation miracle schools the Common Core State Standards school choice the newly emerging school improvement industry and re segregation among others The weight of the evidence indisputably shows little success and no promise for these reforms Thus the authors counsel strongly against continuing these failed policies The book concludes with a review of more promising avenues for educational reform including the necessity of broader societal investments for combatting poverty and adverse social conditions While schools cannot single handedly overcome societal inequalities important work can take place within the public school system with evidence based interventions such as early childhood education detracking adequate funding and full service community schools all intended to renew our nation s commitment to democracy and equal educational opportunity

Urban Education Karen Symms Gallagher, Rodney Goodyear, Dominic Brewer, Robert Rueda, 2013-03-19 Many factors complicate the education of urban students Among them have been issues related to population density racial ethnic cultural and linguistic diversity poverty racism individual and institutional and funding levels Although urban educators have been addressing these issues for decades placing them under the umbrella of urban education and treating them as a specific area of practice and inquiry is relatively recent Despite the wide adoption of the term a consensus about its meaning exists at only the broadest of levels In short urban education remains an ill defined concept This comprehensive volume addresses this definitional challenge and provides a 3 part conceptual model in which the achievement of equity for all regardless of race gender or ethnicity is an ideal that is central to urban education The model also posits that effective urban education

requires attention to the three central issues that confronts all education systems a accountability of individuals and the institutions in which they work b leadership which occurs in multiple ways and at multiple levels and c learning which is the raison d'être of education Just as a three legged stool would fall if any one leg were weak or missing each of these areas is essential to effective urban education and affects the others **Reinterpreting Urban School Reform** Louis F.

Follow the Money Sarah Reckhow, 2013-01-17 Some of the nation's wealthiest philanthropies including the Bill and Melinda Gates Foundation the Walton Family Foundation and the Broad Foundation have invested hundreds of millions of dollars in education reform With vast wealth and a political agenda these foundations have helped to reshape the reform landscape in urban education In **Follow the Money** Sarah Reckhow shows where and how foundation investment in education is occurring and presents in depth analysis of the effects of these investments within the two largest urban districts in the United States New York City and Los Angeles In New York City centralized political control and the use of private resources have enabled rapid implementation of reform proposals Yet this

potent combination of top down authority and outside funding also poses serious questions about transparency responsiveness and democratic accountability in New York Furthermore the sustainability of reform policies is closely linked to the political fortunes of the current mayor and his chosen school leader While the media has highlighted the efforts of drastic reformers and dominating leaders such as Joel Klein in New York City and Michelle Rhee in Washington D C a slower but possibly more transformative set of reforms have been taking place in Los Angeles These reforms were also funded and shaped by major foundations but they work from the bottom up through charter school operators managing networks of schools This strategy has built grassroots political momentum and demand for reform in Los Angeles that is unmatched in New York City and other districts with mayoral control Reckhow's study of Los Angeles's education system shows how democratically responsive urban school reform could occur pairing foundation investment with broad grassroots involvement Bringing a sharp analytical eye and a wealth of evidence to one of the most politicized issues of our day Follow the Money will reshape our thinking about educational reform in America
