Ottawa DN Canada K1R 7Z1 **Packaging as an Effective Marketing Tool** Bill Stewart,1995 Traditionally packaging has
been the responsibility of specialist designers and suppliers And ensuring cost effective packaging has been left to
production purchasing and packaging engineering departments The importance of brand values in packaging is now
recognized With the dominance of self service outlets the pack is the silent salesman Its effective use is vital to a successful
marketing strategy Whether you are working on an existing or new product or venturing into new markets packaging is a
critical consideration It will enable you to direct the focus of packaging design to improve design and cut costs Guidelines are
contained for you to achieve the optimum balance between packaging costs and sales performance You will be shown how to
think through the options prior to and during design work as well as how to maximize your own vital contribution

Packaging Closures and Sealing Systems Nigel Theobald, Belinda Winder, 2009-02-11 The packaging closure is the primary interface between the product and the customer Closures have undergone much evolution and development in recent years The basic function of a closure is to allow easy access to a packaged product and to reclose the package when the contents are not used fully in a single serve However closures are now expected to deliver a wide variety of additional functions such as ensuring that the package has not been opened prior to the first opening by the consumer facilitating the dispensing of the product especially for food and pharmaceuticals and supporting the brand equity value of the product This volume considers the technologies relevant to packaging closures and sealing systems structured by types of pack It is directed at packaging technologists those involved in the design and development of packaging and those who specify or purchase packaging

Concept Research in Food Product Design and Development Howard R. Moskowitz, Sebastiano Porretta, Matthias Silcher, 2008-02-28 Concepts are critical for the development and marketing of products and services They constitute the blueprint for these products and services albeit at the level of consumers rather than at the technical level A good product concept can help make the product a success by guiding developers and advertising in the right direction Yet there is a dearth of both practical and scientific information about how to create and evaluate concepts There has been little or no focus on establishing knowledge bases for concepts Concept development is too often relegated to the so called fuzzy front end Concept Research in Food Product

Design and Development remedies this inattention to product concepts by providing a unique treatment of concepts for the business professional as well as for research scientists. The book begins with simple principles of concepts, moves forward to methods for testing concepts, and then on to more substantive areas such as establishing validity, testing internationally, and with children, creating databases, and selling in new methods for concept testing. The book combines a how-to business book with a detailed treatment of the different facets of concept research. As such, the book represents a unique contribution to business applications in food and consumer research methods. The book is positioned specifically for foods to maintain a focus on a coherent set of topics. *Concept Research in Food Product Design and Development* appeals to a wide variety of audiences: R D marketing, sensory analysts, and universities alike. Corporate R D professionals will learn how to create strong concepts. Marketers will recognize how concepts are at the heart of their business. Sensory analysts will find the book a natural extension of their interest in product features. University students will understand how concept research is a critical part of the consumer connection. *Concept Research in Food Product Design and Development* is the definitive, innovative text in describing how to create, analyze, and capitalize upon new product concepts.

The Visionary Package Herbert M. Meyers, Richard Gerstman, 2004-10-29. The retail market is in a revolution which is creating new opportunities in a world of direct connections where information is exchanged instantly and geography is no longer a barrier. This book contains valuable information and guidelines for marketers, retailers, manufacturers, designers, and communication professionals in relation to new opportunities for brands and products through packaging, brand identity, and creativity.

Business [REDACTED] [REDACTED], 2003. *Developing New Food Products for a Changing Marketplace* Aaron L. Brody, John B. Lord, 2007-11-05. Written by world-class authorities, this volume discusses formulation, sensory, and consumer testing, package design, commercial production, and product launch and marketing. Offering the same caliber of information that made the widely adopted first edition so popular, the second edition introduces new concepts in staffing, identifying, and measuring consumer desires, engineering scale up from the kitchen lab or pilot plant, and generating product concepts. Applying insights from real-life experience, contributors probe the retail environment, covering optimization, sensory analysis, package design, and the increasingly important role of the research chef or culinologist in providing the basic recipe.

Brand Medicine T. Blackett, R. Robins, 2001-04-27. As governments seek to mitigate the cost of state-subsidised healthcare, branding in the pharmaceutical industry has become a critical issue. Drugs companies must change their methods of communication and distribution, focusing more on their direct relationship with the consumer. This requires fundamental changes in consumer behaviour, access to information, freedom of choice, and value for money. Brands and brand values will play a leading role in this process, as has been seen with products such as Prozac and Viagra. This book by Interbrand Newell and Sorrell, the world's leading branding consultancy, provides cutting-edge thinking on this area and lessons for anyone involved in brand development and management.

Visual Identity Susan Westcott Alessandri, 2014-12-18. Brands, companies, and

organizations much like people have personalities and most of what we know and think about their personalities comes through visual identity A visual identity is the strategically planned and purposeful presentation of the brand or organization in order to gain a positive image in the minds of the public including but not limited to its name logo tagline color palette and architecture and even sounds This practical guide explores visual identity from an organizational brand perspective corporate non profit etc rather than a product brand perspective It not only helps readers to understand the meaning and value of an organization s visual identity but also provides hands on advice on how to promote and protect the identity Each chapter draws from current research and also contains real world examples and case studies that illustrate the key concepts

branding@thedigitalage H. Meyers,R. Gerstman,2001-09-14 Brands no longer exist solely in the realm of the physical The advent of the internet and other new digital technologies means that companies be they dot com start ups or traditional bricks and mortar companies must develop a successful strategy for presenting compelling brands in the virtual world Drawing on their experience with Interbrand the world s largest branding consultancy and including chapters by branding experts from Microsoft McDonalds Pepsi Cola and Procter Gamble the authors examine how this should be done and map out the future of e branding
