School Choice In The Real World Robert Maranto, 2018-04-27 This book presents the first published accounts and evaluations of the first free market in education in the U.S. Arizona charter schools. The charter school is fast becoming one of the most significant attempts at public education reform in this country. Over 1100 charter schools operate in twenty seven states with several hundred more to be added in the next two years. School Choice in the Real World looks at the charter school movement through a highly focused lens; it examines charter schools in Arizona which currently account for nearly one quarter of all charter schools. Using this state as a case study, the editors examine the experiences of actual charter school operators, social scientific analysis, policy discussions and criticism and forecasting for the future. School choice is the most talked about reform of American public education yet; writings about choice remain highly speculative because no state has adopted a free market approach to education until now.
