Mathematics around the principle of active student engagement with tasks that reflect the latest brain science on learning. Open creative and visual mathematics tasks have been shown to improve student test scores and more importantly change their relationship with mathematics and start believing in their own potential. The tasks in Mindset Mathematics reflect the lessons from brain science that there is no such thing as a math person; anyone can learn mathematics to high levels. Mistakes, struggle, and challenge are the most important times for brain growth. Speed is unimportant in mathematics. Mathematics is a visual and beautiful subject, and our brains want to think visually about mathematics. With engaging questions, open-ended tasks, and four color visuals that will help kids get excited about mathematics, Mindset Mathematics is organized around nine big ideas which emphasize the connections within the Common Core State Standards (CCSS) and can be used with any current curriculum. *Mathematical Ideas + Math Study Skills + Mathxl 24-month Student Access Kit*

JUMP: Journal for Understanding Mathematical Principles Eliza Akana, Jonelle Flight, Suzanne Forbes, Ann Watanabe, 2011-03-09

If you are looking for a way to help your students master the Common Core State Standards for Mathematics, this is it. Best of all, JUMP will complement ANY textbook or curriculum. JUMP: Journal for Understanding Mathematical Principles is a series of student math journals designed specifically to address the Common Core State Standards for Mathematics. The teacher authors have analyzed and interpreted each Common Core State Standard for Mathematics to provide journal prompts that reflect what students need to know and be able to do at each grade level. Each edition also includes prompts for academic vocabulary terms that are essential to understanding mathematical concepts at each grade level. JUMP deepens students' understanding of mathematical concepts while reinforcing critical processes and proficiencies outlined in the CCSS Standards for Mathematical Practice. JUMP asks students to make sense of problems and persevere in solving them, reason abstractly and quantitatively, construct arguments and critique their work, and the work of others, model with mathematics, and use mathematical tools. JUMP can be used in a variety of settings including whole group instruction, small group instruction, peer learning teams, partners, or individual learning. JUMP can be used for a variety of purposes including pre-assessment, formative assessment, summative assessment, guided practice, independent practice, homework, enrichment, intervention, evidence for parent teacher conferences, or evidence for portfolios. JUMP can be used by a variety of educators including general education teachers, special education teachers, teachers of English language learners, math resource teachers, summer school teachers, intervention teachers, or tutors. And again, JUMP will complement ANY textbook or curriculum. The JUMP Student Editions are scaffolded from primary to upper grades. In Grades 4-5, Signal Words are written in color in the prompt, and there are color-coded response boxes, but at these grade levels, the Signal Words are not included in the boxes. The JUMP Teacher's Guides for each grade level are sold
