Calculus Kevin M. O'Connor, O'Connor, 2005 Correlated directly to Calculus The Language of Change an engaging new text by David Cohen and James Henle this outstanding lab manual provides numerous labs projects and exercises to teach students how to use MATLAB Written in a friendly and accessible style this is the ideal resource for students to practice what they've learned in the text

Undergraduate Mathematics for the Life Sciences Glenn Ledder, Jenna P. Carpenter, Timothy D. Comar, 2013 There is a gap between the extensive mathematics background that is beneficial to biologists and the minimal mathematics background biology students acquire in their courses The result is an undergraduate education in biology with very little quantitative content New mathematics courses must be devised with the needs of biology students in mind In this volume authors from a variety of institutions address some of the problems involved in reforming mathematics curricula for biology students The problems are sorted into three themes Models Processes and Directions It is difficult for mathematicians to generate curriculum ideas for the training of biologists so a number of the curriculum models that have been introduced at various institutions comprise the Models section Processes deals with taking that great course and making sure it is institutionalized in both the biology department as a requirement and in the mathematics department as a course that will live on even if the creator of the course is no longer on the faculty Directions looks to the future with each paper laying out a case for pedagogical developments that the authors would like to see

Exploring Calculus Crista Arangala, Karen A. Yokley, 2016-08-03 This text is meant to be a hands on lab manual that can be used in class every day to guide the exploration of the theory and applications of differential and integral calculus For the most part labs can be used individually or in a sequence Each lab consists of an explanation of material with integrated exercises Some labs are split into multiple subsections and thus exercises are separated by those subsections The exercise sections integrate problems technology Mathematica R visualization and Mathematica CDFs that allow students to discover the theory and applications of differential and integral calculus in a meaningful and memorable way
