Mathematics In Daily Living:

The Mathematics of Everyday Life Alfred S. Posamentier, Christian Spreitzer, 2018-08-21 Two experienced math educators help the average reader discover not only the everyday usefulness of math but the fun that comes from mastering the basics of arithmetic algebra geometry and more If you think of mathematics as a series of pointless classroom exercises without much relevance to real life this book will change your mind As the authors show math is deeply embedded in almost every aspect of daily life from managing your personal finances making consumer purchases and sharpening your computational skills to learning to apply mathematical concepts that will give you a better grasp of both ordinary and extraordinary events and help you better appreciate the world we live in With some basic geometry under your belt you ll discover that there is an optimal point on a soccer field from which to shoot a goal And you ll be more clever with the gears of a bike If you like to play cards or go to the casino knowing something about probability will give you an edge You ll also have an enhanced understanding of the whispering effect inside the Capitol rotunda why a car s headlights are so bright and even why sewer covers are round After reading this entertaining and instructive book you ll come away with a whole new awareness of how elegantly mathematics explains everyday experiences and observations from present day items to classical art and architecture

Math in Everyday Life David E. Newton, 2001 With Math in Everyday Life students apply basic math skills to all aspects of everyday life Students use realistic and accurate forms worksheets and other paperwork to help build an understanding of an comfort level with the forms and related math applications that are part of daily living

Philosophy, Learning and the Mathematics Curriculum Xuehui Xie, Phil Francis Carspecken, 2019-02-18 Mathematics curriculums used in progressive classrooms of the United States and in classrooms of the People s Republic of China presuppose markedly different philosophies Xie and Carspecken reconstruct different assumptions operating implicitly within mathematics curriculums developed by the Ministry of Education in China and NCTM in the United States Each curriculum is constructed upon a deep structure holistically integrating presuppositions about the nature of the human self society learning processes language concepts human development freedom authority and the epistemology and ontology of mathematical knowledge Xie and Carspecken next present an extended discussion of the two main philosophical traditions informing these curriculums dialectical materialism in the case of the Chinese mathematics curriculum and Dewey s instrumental pragmatism in the case of NCTM Both philosophies were developed as movements out of Hegelian idealism while retaining the anti dualist and anti empiricist insights of Hegel s thought The history of dialectical materialism and Dewey s instrumentalism is carefully examined by the authors to identify both similarities and sharp differences in the resulting mature philosophies Drawing upon more recent philosophies of intersubjectivity Brandom Habermas and dialectical materialist psychologies Vygotsky Luria the authors conclude this book with arguments for

overcoming the limitations of a purely instrumentalist framework and for expanding potentialities implicit within dialectical philosophies This book will be of value to a broad audience including mathematics educators philosophers curriculum theorists social theorists and those who work in comparative education and learning science
