Securitization is a financial technique that pools assets together and in effect turns them into a tradable security The end result of a securitization transaction is that a corporation can obtain proceeds by selling assets and not borrowing funds In real life many securitization structures are quite complex and enigmatic for practitioners investors and finance students Typically books detailing this topic are either too lengthy too technical or too superficial in their presentation Introduction to Securitization is the first to offer essential information on this topic at a fundamental yet comprehensive level providing readers with a working understanding of what has become one of today's most important areas of finance Authors Frank Fabozzi and Vinod Kothari internationally recognized experts in the field clearly define securitization contrast it with corporate finance and explain its advantages They carefully illustrate the structuring of asset backed securities ABS transactions including agency mortgage backed securities MBS deals and nonagency deals and show the use of credit enhancements and interest rate derivatives in such transactions They review the collateral classes in ABS such as retail loans credit cards and future flows and discuss ongoing funding vehicles such as asset backed commercial paper conduits and other structured vehicles And they explain the different types of collateralized debt obligations CDOs and structured credit detailing their structuring and analysis To complement the discussion an introduction to credit derivatives is also provided The authors conclude with a close look at securitization's impact on the financial markets and the economy with a review of the now well documented problems of the securitization of one asset class subprime mortgages While questions about the contribution of securitization have been tainted by the subprime mortgage crisis it remains an important process for corporations municipalities and government entities seeking funding The significance of this financial innovation is that it has been an important form of raising capital for corporations and government entities throughout the world as well as a vehicle for risk management Introduction to Securitization offers practitioners and students a simple and comprehensive entry into the interesting world of securitization and structured credit

Subprime Mortgage Credit Derivatives Laurie S. Goodman, Shumin Li, Douglas J. Lucas, Thomas A. Zimmerman, Frank J. Fabozzi, 2008-06-02 Mortgage credit derivatives are a risky business especially of late Written by an expert author team of UBS practitioners Laurie Goodman Shumin Li Douglas Lucas and Thomas Zimmerman along with Frank Fabozzi of Yale University Subprime Mortgage Credit Derivatives covers

state of the art instruments and strategies for managing a portfolio of mortgage credits in today's volatile climate. Divided into four parts, this book addresses a variety of important topics including mortgage credit, non-agency first and second lien mortgage securitizations, alternate structures and subprime triggers, credit default swaps on mortgage securities, ABX cash synthetic relationships, CDO, credit default swaps and much more. In addition, the authors outline the origins of the subprime crisis, showing how during the 2004-2006 period, as housing became less affordable, origination standards were stretched and when home price appreciation then turned to home price depreciation, defaults and delinquencies rose across the board. The recent growth in subprime lending along with a number of other industry factors has made the demand for timely knowledge and solutions greater than ever before, and this guide contains the information financial professionals need to succeed in this challenging field.
