Powell, Marilyn Frankenstein, 1997-04-17 Presents the emerging field of ethnomathematics from a critical perspective challenging particular ways in which Eurocentrism permeates mathematics education and mathematics in general      *Inventing the Mathematician* Sara N. Hottinger, 2016-03-01 Where and how do we as a culture get our ideas about mathematics and about who can engage with mathematical knowledge Sara N Hottinger uses a cultural studies approach to address how our ideas about mathematics shape our individual and cultural relationship to the field She considers four locations in which representations of mathematics contribute to our cultural understanding of mathematics mathematics textbooks the history of mathematics portraits of mathematicians and the field of ethnomathematics Hottinger examines how these discourses shape mathematical subjectivity by limiting the way some groups including women and people of color are able to see themselves as practitioners of math Inventing the Mathematician provides a blueprint for how to engage in a deconstructive project revealing the limited and problematic nature of the normative construction of mathematical subjectivity      Stepping Stones for the 21st Century , 2007-01-01 Over the years a number of must read articles and book chapters have appeared work that has formed the foundational stepping stones of mathematics education research for the 21st century Twelve such seminal articles have been reproduced in this book Each is accompanied by two independent appraisals of the longer term impact of the work within and beyond the mathematics education research community Collectively these writings cover a wide range of topics and provide a broad overview of the

outstanding contributions of Australasian mathematics education research prior to 2000      **Mathematical Knowledge: Its Growth Through Teaching** Alan Bishop, Stieg Mellin-Olsen, Joop van Dormolen, 2013-11-27 In the first BACOMET volume different perspectives on issues concerning teacher education in mathematics were presented B Christiansen A G Howson and M Otte Perspectives on Mathematics Education Reidel Dordrecht 1986 Underlying all of them was the fundamental problem area of the relationships between mathematical knowledge and the teaching and learning processes The subsequent project BACOMET 2 whose outcomes are presented in this book continued this work especially by focusing on the genesis of mathematical knowledge in the classroom The book developed over the period 1985-9 through several meetings much discussion and considerable writing and redrafting Our major concern was to try to analyse what we considered to be the most significant aspects of the relationships in order to enable mathematics educators to be better able to handle the kinds of complex issues facing all mathematics educators as we approach the end of the twentieth century With access to mathematics education widening all the time with a multitude of new materials and resources being available each year with complex cultural and social interactions creating a fluctuating context of education with all manner of technology becoming more and more significant and with both informal education through media of different kinds and non formal education courses of training etc growing apace the nature of formal mathematical education is increasingly needing analysis      **The Brilliance of Black Children in Mathematics** Jacqueline Leonard, Danny B. Martin, 2013-03-01 This book is a critically important contribution to the work underway to transform schooling for students who have historically been denied access to a quality education specifically African American children The first section of the book provides some historical perspective critical to understanding the current state of education in the U S specifically for the education of African American children The following sections include chapters on policy learning ethnomathematics student identity and teacher preparation as it relates to the mathematical education of Black children Through offering counternarratives about mathematically successful Black youth advocating for a curriculum that is grounded in African American culture and ways of thinking providing shining examples of the brilliance of Black students and promoting high expectations for all rather than situating students as the problem the authors of this book provide powerful insights related to the teaching and learning of mathematics for African American students As is made evident in this book effective teaching involves much more than just engaging students in inquiry based pedagogy Kitchen 2003 The chapters offered in this book demonstrate how mathematics instruction for African American students needs to take into account historical marginalization and present day policies that do harm to Black students Kunjufu 2005 Empowering mathematics instruction for African American students needs to take into consideration and promote students cultural spiritual and historical identities Furthermore mathematics instruction for African American students should create opportunities for students to express themselves and the needs of their communities as a means to promote social justice both within their classrooms and communities
