M. Legendre,2015-06-16 Excerpt from Elements of Geometry and Trigonometry The Editor in offering to the public Dr Brewster s translation of Legendre s Geometry under its present form is fully impressed with the responsibility he assumes in making alterations in a work of such deserved celebrity In the original work as well as in the translations of Dr Brewster and Professor Farrar the propositions are not enunciated in general terms but with reference to and by the aid of the particular diagrams used for the demonstrations It is believed that this departure from the method of Euclid has been generally regretted The propositions of Geometry are general truths and as such should be stated in general terms and without reference to particular figures The method of enunciating them by the aid of particular diagrams seems to have been adopted to avoid the difficulty which beginners experience in comprehending abstract propositions But in avoiding this difficulty and thus lessening at first the intellectual labour the faculty of abstraction which it is one of the primary objects of the study of Geometry to strengthen remains to a certain extent unimproved About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original
