C. Norman,1994 *Mathland* is a problem solving adventure with the problems coming from all areas of maths **The Myth of Ability** John Mighton,2003-05-01 John Mighton s revolutionary bestselling guide to how every child can learn math through his groundbreaking JUMP program A student in a remedial class who couldn t count by twos is now in an academic program a year ahead of her grade level An entire Grade 3 class including so called slow learners scores over 90% on a Grade 6 7 math test These are just two of mathematician John Mighton s many success stories since he started JUMP Junior Undiscovered Math Prodigies a not for profit organization providing free math tutoring for elementary level students from low income homes In *The Myth of Ability* John Mighton tells JUMP s fascinating story and explains its teaching method with lots of simple examples *All Things Being Equal* John Mighton,2020-01-07 NATIONAL BESTSELLER From the award winning founder of JUMP Math *All Things Being Equal* is a proven guide to succeeding in math and a passionate argument for why this success can and must be available to the majority instead of the privileged few For two decades John Mighton has developed strategies for fostering

intellectual potential in all children through learning math Math Mighton says provides us with mental tools of incredible power When we learn math we learn to see patterns to think logically and systematically to draw analogies to perceive risk to understand cause and effect among many other critical skills Yet we tolerate and in fact expect a vast performance gap in math among students and live in a world where many adults aren't equipped with these crucial tools This learning gap is unnecessary dangerous and tragic he cautions and it has led us to a problem of intellectual poverty which is apparent everywhere in fake news political turmoil floundering economies even in erroneous medical diagnoses In All Things Being Equal Mighton argues that math study is an ideal starting point to break down social inequality and empower individuals to build a smarter kinder more equitable world Bringing together the latest cognitive research and incremental learning strategies Mighton goes deep into the classroom and beyond to offer a hopeful and urgent vision for a numerate society
