Blatchford Professor of Early Childhood Education Institute of Education University of London How does the home experience of children from poor and ethnic minority communities influence their adaptation to school How does the traditional child centred and progressive pedagogy of early years classrooms meet the needs of children from culturally diverse backgrounds Starting School seeks to address these key questions by tracing the learning experiences of individual children from a poor inner urban neighbourhood half of them from Bangladeshi families as they acquire the knowledge appropriate to their home culture and then take this knowledge to their reception class The book highlights the small differences in family life in parenting practices in perspectives on childhood and in beliefs about work and play which make a big difference to children s adaptations to school In other words it shows how children succeed and fail from their early days at school It shows too how the good intentions of good teachers can sometimes allow children from certain backgrounds to become disaffected and learn to fail and it suggests ways of working with children from working class and multicultural families which may help both children and parents to gain a better understanding of school learning in the UK
