distress **Becoming a Teacher of Language and Literacy** Brenton Doecke, Glenn Auld, Muriel Wells, 2014-12-15
 Becoming a Teacher of Language and Literacy explores what it means to be a literacy educator in the 21st century. It promotes a reflective and inquiry-based approach to literacy teaching and examines three central questions: 1. How do teachers approach the teaching of reading and writing, speaking and listening within a digital age? 2. How do teachers approach the standardisation of literacy, including high-stakes testing? 3. How do teachers work within the framework of the Australian curriculum, English? The book covers a range of contemporary topics in language and literacy education, including reading and creating digital texts, supporting intercultural engagement in literacy education, and developing community partnerships. Each chapter features teacher narratives, current theoretical perspectives, examples of practice, and reflective questions. The narratives are designed to prompt reflection about teachers' professional practice within local school settings. They convey the voices of teachers as they grapple with the challenges of their professional practice. *Love Tutoring* Julia Silver, 2024-09-06
 Written by former school leader Julia Silver, *Love Tutoring: Be the Tutor Your Student Needs* is an essential guide to professional development for all tutors. Based on her Foundations of Effective Tutoring course, Julia shares an enthusiastic and enabling vision of tutoring as a burgeoning space within the educational landscape. At a time when teacher retention and pupil attendance are at an all-time low, tutoring provides a gentler, more person-centred and holistic approach to teaching and learning. Once considered a Plan B option, tutoring is fast becoming a legitimate career choice. The rollout of the UK government's National Tutoring Programme has brought tutoring into the spotlight. Previously, considered shadow schooling, over the last decade a quarter of all 11-16 year olds have received private tuition in England and Wales, rising to 42% in London. But for tutoring to take its place in the future of education and become an affordable option for all our students, we need more and better qualified tutors. Combining theory and practice, this book provides tutors with a solid grounding in the pedagogy of tutoring. Julia takes the big ideas from evidence-based practice in teaching and learning today and makes them relevant and accessible to the ways tutors work. Backed up by real-life examples and interviews with professional tutors, this book offers a broad insight into the tutoring profession and explores the different ways to make tutoring a career that you love. *Love Tutoring* is an invitation, a provocation, and a call to action. This book goes right to the heart of the tutoring relationship and will give every tutor a roadmap for becoming the tutor their student needs. Suitable for tutors of all ages, subjects, and levels of expertise, as well as interested parents, agencies, schools, or other organisations who employ tutors. *Teacher's Skills Tests For Dummies* Colin Beveridge, Andrew Green, 2014-06-03
